### **WHAT TO SEARCH IN FMCSA REGISTERED DEVICES**

**Device Name:** Cloud Logs

**Model Number:** AT5000

**ELD Identifier:** AR1ONT

**Company:** Arion Tech Inc.

# 02 INSTALLATION

## SECTION TWO

Device used get connected to ECM diagnostic port of the truck. Different connectors can be used to connect the device. Once the Device is connected with the ECM diagnostic port ,the data from the vehicle could easily transferred to the Arion Tracking application Called 'Cloud Logs'.

### STEPS

1. Locate the truck ECM port/Diagnostics Port.
2. Plug the black box (AT3000/AT5000 )device to ECM Port with the connector.
3. Connect the bluetooth of the Display device with black box.
4. Blue Bar on the top of the app screen means ECM data is connected to the Cloud App.

## CLOUD LOGS

5. From your Mobile or Tablet device screen, open Cloud Logs App
6. Login page Appears for verification
7. Enter valid username and password provided by your company.
8. Once Logged in, you are ready to use.

### DRIVING WITH ELD

Once your device is connected with ECM, your driving will be captured automatically when vehicle is moving at 5mph or more and the duty status will change to DRIVING.

# 03 HOS HOME

## SECTION THREE

Once the driver logs in with his credentials, he will get the main HOS screen. HOS options are available on main home page and in right side drop down menu too.

The main page consists of following options:

- Snapshot
- Info
- Clocks
- Request Logs
- Log Grid
- Duty Status
- Change Driver
- Co-Driver Login
- Co-Driver Logout
- Diagnostics
- Resync Logs
- Enforcement
- Reset
- Sync

### SNAPSHOT

This option gives the overview for the total remaining and completed hours according to his duty status. The negative sign in front of number shows the remaining time

### CLOCKS

The drivers can see the available and over hours in the form of colored bars. It will give the current duty status along with Hours remaining or over in other status like On duty, Driving and shift.

Rule set can be changed from these arrows which are located on top right corner of clocks option.

### INFO

The info tab provide the basic information to make the logs. It contains the Company, Drivers and vehicles basic information

### LOG GRID

The grid has four parts Off duty, Sleep, Driving, On duty. The grid provides the running logs and the current duty status of thee driver. The detail information of duty status can be seen by double clicking the status area. The grids for last 14 days can be scrolled by clicking the "green arrow" on top.

### DUTY STATUS

By simply clicking on the options driver can change his duty status whether its ON duty, off duty, sleep, drive. When you changed the duty status it will automatically change the status on Grid as well. Driver can select duty status according to its shift. When he selects option 7 than a “change status” box will appear and driver has to fill the required information of additional comment, document id and trailer id and than driver can save it and this will change the driver’s grid by itself.

### REQUEST LOGS

It is an option for driver to send the logs via email or Fax. To do this driver just need to put the email address or Fax number. The logs will be sent within 5 minutes of request.

### CHANGE DRIVER

In case of team driver; both drivers can change there status active drivers Team drivers can change there status back and forth

### CO-DRIVER

The co-driver has to login on the same device and once the co-driver login the system than his duty status will be off duty and he can change his status to Active driver whereas the first driver changed it into inactive driver. When the co-driver is active driver than he can change his duty status to his status at that time. And this will start his grid from that time.

**CO-DRIVER LOGOUT**

After his shift co-driver can simply change his status to inactive driver and can logout

**DIAGNOSTICS**

This provides the information from ECM like odometer, Speed, Fuel economy, Engine Oil temp, Battery Voltage etc.

**ENFORCEMENT**

Anytime Officer stops the Driver and they need to look for Logs. Officer can check the enforcement mode as it has all the features compliant with FMCSA

**RESYNC**

Use this features to manually resync the tablet to portal. This syncs tablet to portal

**RESET**

Forcefully logout

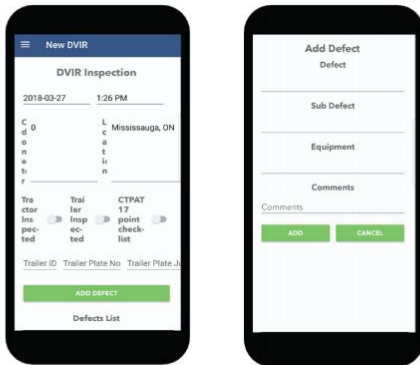

**SYNC**

This sync option is used to manually sync data both ways from tablet and portal

## 04

## DVIR/ PRE-TRIP

## SECTION FOUR

As per MTO/DOT Pre-Trip Inspection is only valid for 24 hours

**DVIR INSPECTION**

1. Click on + Green sign on top right to open new Pretrip inspection
2. Select the vehicle inspected.
3. Enter Trailer details
4. To add a defect , click ADD Defect and choose the defect and sub defect
5. Add Equipment that has defect.
6. Enter Comments.
7. Save it and once saved it will show under DVIR LIST

Make sure the Pre-trip is saved before going out.

Once Pre-trip is done, do not log out for next 24 hour. If you log out the pretrip will get deleted from tablet.

So always logout at your Home terminal after finishing the trip.

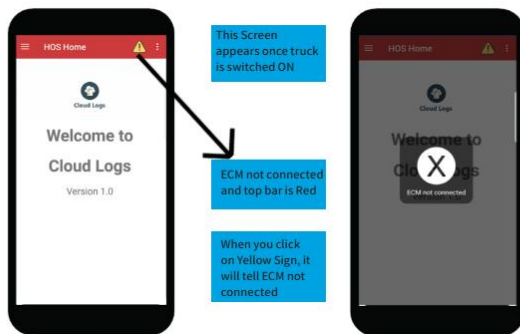

**HOW TO GO TO PREVIOUS PRE-TRIP**

1. Click on HOS Home
2. From drop down menu, click on DVIR (Pre-trip)
3. You will get DVIR List
4. Click on the one you need to see.
5. Pop up window will open with options Details, Delete or Repair
6. Click on Details and you can view the Pretrip report

# 05 MALFUNCTIONING GUIDE

## SECTION FIVE

### FMCSA Guidelines set forth in §395.22

Motor carrier responsibilities – In general. (h) A motor carrier must ensure that its drivers possess onboard a commercial motor vehicle on ELD information packet containing the following items: (3) An instruction sheet for the driver describing ELD malfunction reporting requirements and recordkeeping procedures during ELD malfunctions.

### Malfunctioning Guidelines

**Top bar on the device is Red:** Red color means the ECM has not been connected to the Display device. To verify the status, click on the Yellow Triangle the display will say ECM not connected.

**Solution:** The Driver can check if the Black box is connected properly to the ECM port. The driver or company can call our 24/7 support line 1905-451-6588 or they can email at support@ariontech.ca. Our staff will help the user for the connectivity.

**Red Bar Remains Red:** if the connection is not maintained by trouble shooting a new device has to be installed.

**Malfunction time duration:** If a motor carrier needs a time extension, they must notify the FMCSA Division Administrator for the state of motor carrier's principal place of business within 5 days after a driver notifies the motor carrier according to the guidelines set forth in §395.34(2)

### If an ELD Malfunctions, a Driver must:

1. Note the malfunction of the ELD and provide written notice of the malfunction to the motor carrier within 24 hours;
2. Reconstruct the record of duty status (RODS) for the current 24-hour period and the previous 7 consecutive days, and record the records of duty status on graph-grid paper logs that comply with 49 CFR 395.8, unless the driver already has the records or retrieves them from the ELD; and
3. Continue to manually prepare RODS in accordance with 49 CFR 395.8 until the ELD is serviced and back in compliance. The recording of the driver's hours of service on a paper log cannot continue for more than 8 days after the malfunction; a driver that continues to record his or her hours of service on a paper.

# 06

## DOT REFERENCE CARD
