

Comment Pirater UN Compte Facebook Sans Logiciel: ways to hack

There are many reasons to hack someone's facebook account. Though the process to hack is not easy for normal people but here are some tips you can follow to do so. Such as:

Guess the password:

The very easy and safe way to hack someone's facebook id is by guessing his or her password. You need to put the person's email id on the facebook page and then the password.

- **Pros:** the advantage of this method is that the person will never know that his/her account in been hacked unless you use the account to share something.
- **Cons:** the only con or disadvantage of this process is the guessing. You need to try a lot of guessing to unlock the profile.

The normal method:

In this method you have to enter the email id of the account you want to hack. Then you have to click on the 'forgot password'. Then the facebook will send a verification code to the email address or to the mobile number attached to that account. And as soon as you put that code you can open the account by selecting a new password.

- **Pros:** this method is easy and quick. You will need no extra time to hack at all.
- **Cons:** you need to have access to the person's either mobile or email id to get the verification code. And the next time the person will try to access his/her profile will know that it's been hacked.

Using software:

There is some hacking software also available to hack facebook profiles. In this process, you will get a link from that software and you will need to download and install that software into the targeted person's phone. And some more steps to follow to get access to the person's facebook.

- **Pros:** you can even access other social media accounts as well.
- **Cons:** you need the person's phone you want to hack for some time.

Using online panel:

Comment pirater un compte facebook sans logiciel is possible with this method. You need to open the online site first. Then you need to put the person's Facebook URL in the specific space. You will get the URL by opening the person's Facebook profile from your account.

- **Pros:** this the easiest process ever. You don't need any software or the person's mobile or anything. Also, the process is very simple and quick too.
- **Cons:** not all online hacking panels are safe to use so choose a reliable one. Read more: <http://face-geek.com/>
