What if everything you do is being recorded, not just your online content but everything else like the private conversations in your home? What if your “friends” and neighbors have been reporting what you say to the government? **It’s neighbor against neighbor.**

Special Source Operations (SSO)
The NSA taps into just about all Internet wires to collect data (Upstream collection). Some (or all) of it appears to be stored at the Utah Data Center to be searched (used against you) for later.

They infiltrate big tech companies (back-door collection) that don’t “play ball” (front-door collection).¹ Illegal activity is given to law enforcement to do “**parallel construction**” and you’re then arrested only because they violated your constitutional rights.²

THEY ARE WATCHING YOU

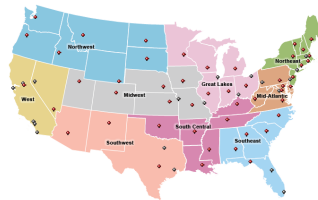

While most know of the Department of Homeland Security’s other programs (ICE, TSA, etc.), many don’t know about their **fusion centers.**

Each one combines various groups like federal agencies (NSA, CIA, FBI, etc.), local government (police, firefighters, paramedics, etc.), military personnel, and even **certain citizens** (doctors, nurses, ex-law enforcement, ex-military, mall security guards, IT specialists, etc.) and **citizen programs** (FBI’s InfraGard, DHS’s Citizen Corps, etc.) to watch you.

There is at least one center in each state.

You can be added to the watch list by being reported in many different ways: DHS’s NSI, CIA’s TrapWire, FBI’s Terrorist Screening Center, or a report by a Threat Liaison Officer (who can be a normal citizen). Even doing certain activities online will get you reported by private companies.^{3,4} After that, many believe you will be **gangstalked** to cause psychological harm with the goal of suicide, homelessness, or the psych ward.^{5,6,7}

Be careful what you do or say.
