## IELTS Preparation Tips Helped My Students improve their score

### Can You Relate To Any Of These Exam Experiences?

I had some foreign students in Austin/ Texas, they wanted to study or work abroad so they had to get the required score to achieve their goals. While we were studying together, they were facing some difficulties:

They found difficult to answer the listening questions while listening the record. They always ran out of time during the test before answering all questions. They sometimes missed almost half the listening questions. In the multiple choice questions, they found difficult to narrow the options. They were challenging to find the relevant lines in the reading passages. They had difficulty making a plan before writing a task. They found difficult to match the headings in the reading passages. They had a problem to speak something about a cue card in the speaking section.

## **They had never studied effective IELTS strategies before.**

That they tried to improve their score took too much time from important tasks they needed to do. They didn't need massively complex strategies that require you to be a rocket scientist. They were tired of seeing risky strategies that could lead to failure. They have struggled with the exact same frustration you are now facing.

Until recently, I was looking a way to overcome these challenges. I kept thinking to find a solution. From my experience, I have collected all ideas, my students used to get the required **IELTS** **® score**, I have in my mind. When they applied the strategies, they became successful to overcome the problems. Now, it is your turn. I feel your pain my students experienced all of these.

## Fortunately I have created Powerful Exam Strategies, Tips and Tricks

Thanks to my students, I luckily managed to stumble upon a working ebook!
