

Hiring an Electrical Contractor

Hiring a good electrical contractor is important whether you are remodeling or building a new home. They will ensure that you have safe, reliable electrical outlets and lighting fixtures. You will also want to ask about surge protection, a major concern when building in Tampa Bay. Additionally, a good electrical contractor will be experienced in dealing with storms, such as hurricanes and lightning.

In addition to installing wiring and lighting, electrical contractors also repair and maintain electrical systems [Electrical Panel](#). They work closely with a general contractor or remodeling contractor to ensure that all wiring complies with Clearwater, FL building codes. They will also install fixtures and switches and fix any other visible components of the electrical system. The electrician will also be able to troubleshoot problems and perform maintenance and inspections.

If you are going to hire an electrical contractor, make sure they have a valid license and are properly insured. This is important because a license proves that a company has the proper training to handle electrical projects. It is also helpful to have a list of references from past customers. It is also important to check if the electricians will be honest with you about the cause of any problem you're experiencing.
