

## 1. Add fund via crypto currencies

- You must have a wallet and available coins

+ Create one on <https://www.binance.com/>

+ Buy coins here: <https://www.binance.com/en/crypto/buy/> using Credit Card or you can get from your customers: <https://www.binance.com/en/my/wallet/account/main/deposit/crypto> (Choose a type of wallet so customer will send or ask them which one to send, most popular coins: BTC, USDT TRX Tron (TRC20), ETH Ethereum, LTC Litecoin, BCH Bitcoin Cash)

+ If you don't like Binance, you can choose another wallet provider:

<https://remitano.com/home/vn>, which you can buy Coins by using local currency of some supported countries such as: VND Bank transfer in Vietnam, PKR in Pakistan, GHS in Ghana, VES in Venezuela, KHR in Cambodia, KES in Kenya, MYR in Malaysia, INR in India, ZARR in South Africa, Nigeria

- Send your Coins to us

When you have Coins balance, you can use Withdraw feature to send to our wallet address, choose the right type (BTC, LTC, USDT, ...) and network (TRX20, ERC, ...) and enter amount and withdraw (means you sending fund to our wallet address, it also can be understood as external address) then wait a few moment for transaction to complete and confirmed

+ To get our wallet address manually, you can find on our Add fund page > Manual methods:
