

Development on Sanctuary continued in September. The frontend design of the marketplace is nearing completion, with the smart contracts almost ready to be wired up. This means that we'll soon be moving into QA mode on the initial cut of the Sanctuary marketplace before a full launch on Base L2. We look forward to introducing the community to the marketplace in November.

On the bonds side, Echelon and Parallel Studios worked together to clarify any remaining questions around integrating off-chain aspects for lending assets between bond members. While we cannot commit to an ETA for bond completion, we are starting to reach out to some organized bonds to participate in an early alpha test of the platform once it is ready. If you are a large bond with 20+ members that would like to be considered for future waves of early testing, please reach out to [info@echelon.io](mailto:info@echelon.io).
