ROADMAP

- 1) Expand the asset, by giving away a small sample 1-2 assets to wealthy NXT owners so that they become interested and perhaps buy the asset(a form of free advertising)
- 2) Periodically review the asset composition and adjust the portfolio if needed
- 3) Gather more investors, while I myself will invest more BTC into NXT and then into this fund
- 4) As soon as we hit 100 shareholders we will start using the inside voting system to decide about future investment ideas
- 5) Continue to sell the OWN ASSETS, and have the Issuing address own 30% of the asset only, and then later on 0%
- 6) As soon as the first assets start to give out dividends we will give out too! At first a small %, to grow the fund faster, but later on we will change that. We will decided this via voting!
