

Dear Senator,

Scott Pruitt, Donald Trump's nominee to run the Environmental Protection Agency, has built a record of consistently supporting polluters over the health and safety of American families. From eliminating his own Environmental Enforcement Unit as Attorney General, to copying and pasting a letter written by the oil and gas industry and sending it to the White House, to suing the EPA to stop protections against Mercury, a dangerous neurotoxin, Pruitt has shown where his priorities are time and time again: with big polluters, not American families.

Now it is time for all Senators to show their priorities. Pruitt is unfit to be EPA administrator, poses a danger to the air and water of all Americans, and must be rejected by the Senate for the good of our communities and our nation.

Today, we present you with a "Pruitt Survival Kit" containing a bottle of clean water and an air mask.

Given Pruitt's record of assaults on clean air and clean water safeguards, both will be needed if Pruitt is allowed to seize the Environmental Protection Agency and enact the radical pro-polluter agenda which former Republican Congressman Joe Scarborough has called "out of the mainstream."

Please, make this survival kit useless by rejecting Pruitt so that he is never allowed to let polluters foul our air and water in the first place.

Sincerely,

Concerned citizens of America
