

## FMGE JUNE-2109

## QUESTIONS

## 1. Drug of choice for MRSA?

Answer: Vancomycin (Note: For VRSA – DOC is Daptomycin)  
(DOC for nasal carriers of MRSA – mupirocin)

## 2. Vaccines given post-splenectomy give protection from diseases caused by?

Answer: ?S.Pneumoniae, Hemophilus Influenza, and Nesseria Meningitidis

## 3. A child had chocolate pastry and got diarrhea within 3 hours of consumption. Which microorganism is responsible for this?

Answer: Staph Aureus

## 4. A 12 year old girl with irritability, dry mouth and slow skin pinch. Next step of management is?

Answer: - Ringer's Lactate

## 5. Which of the following is determining factor for severity of TOF?

Answer: Pulmonary Stenosis

## 6. Most common cause of blindness in India?

Answer: cataract

## 7. How much folic acid supplementation should be given in pregnancy?

Answer: 400 µg/day

## 8. A 27 years old female with history of PID. She is unable to conceive for last 6 months with unprotected sex. Next step of management is?

Answer: Hysterosalpingography

## 9. Weight gain of female in pregnancy?

Answer: 11-13kg

## 10. How much is the sodium concentration in ORS as per WHO?

Answer: 75mmol

11. Which of the following is not seen in tumor lysis syndrome?

Answer: ?Hypercalcemia

( Explanation: Tumor lysis syndrome: Hyperkalemia, hyperphosphataemia, HYPOCALCEMIA, hyperurecemia and increased BUN)

12. Most common tumor of anterior mediastinum?

Answer: Thymoma

13. Most common cancer metastasizing to brain?

Answer: Lungs

14. Lucio phenomenon is seen in?

Answer: LL (non nodular Lepromatous Leprosy)

15. Which type of anemia is seen in Rheumatoid arthritis?

Answer: Normocytic normochromic anemia

16. What is the normal sperm concentration according to WHO ?

Answer: 15 million/ml

17. Deep parotid inflammation, visible at which side?

Answer. below left ear

18. Which of the following is most potent anti-oxidant?

Answer: Vitamin E

19. I/V Anesthesia which is used in day care surgery ?

Answer: Propofol

20. Which test is done at subcentre during pregnancy?

Answer: Hemoglobin

21. How much population is covered under a PHC in plain area?

Answer: 30,000

22. Defect seen due to Failure of closure of cranial neuropore ?

Answer: Anencephaly

23. Sensitive and specific marker for MI?

Answer: Troponin T and I

24. Most common clinical feature seen in prolactinoma next to galactorrhoea?

Answer: Amenorrhoea

25. Which prostaglandin is not used in labor induction?

Answer: PGF 2 alpha

(PGE2, PGE1 are used)

26. Which of the following is an abductor of hip joint?

Answer: Gluteus Minimus

Gluteus medius, Gluteus Minimus and tensor fascia lata are primary hip abductors. Sartorius and piriformis are secondary.

27. Transport media for salmonella?

Answer: Buffered glycerol saline

Transport media for salmonella are: buffered glycerol saline and Cary Blair medium

28. Nasopharyngeal carcinoma causes deafness by?

Answer: serous effusion/SOM/ Eustachian tube block

29. Evisceration is removal of which coats of eye?

Answer: Middle and inner layer

Evisceration is removing all eye structures except sclera shell (outer layer) and extraocular muscles

30. Maximum content of vitamin A is found in?

Answer: Halibut Liver Oil

31. Wernickes encephalopathy is due to deficiency of which vitamin?

Answer: Vit B1

32. Which of the following is WHO Obesity index ?

Answer: Quetlet Index

33. A confused patient was brought to emergency, opens the eye with painful stimulation and extends the arm on unilateral side on needle prick. His GCS score will be?

Answer: 9

34. A female patient feels that she has necrosed intestine. Which psychiatric illness she is suffering from?

Answer: Nihilistic delusion

35. Which type of hepatitis which can cause chronicity?

Answer: Hep C

36. According to WHO, adolescent age is?

Answer: 10-19 years

37. The most common cause for PPH is?

Answer: Uterine Atony

38. What type of blood is carried by umbilical artery?

Answer: Deoxygenated blood from fetus to placenta

39. Most common affected site in charcoat's joint is?

Answer: Foot/ankle

40. Couvelaire uterus is seen in which condition?

Answer: Abruptio placenta

41. Testicular artery is the branch of?

Answer: Abdominal Aorta

42. DOC for alzheimer's dementia?

Answer: Donepezil

43. DOC for neurogenic diabetes insipidus ?

Answer: Desmopressin

44. Which enzyme deficiency is seen in maple syrup urine disease?

Answer: branched chain amino acid/ alpha ketoacid dehydrogenase

45. Which of the following nodules seen in Diabetic nephropathy?

Answer: Kimmelsteil Wilson nodule

46. A girl came with slash on the area on a given picture, lost sensation in the medial half of palmer area. Which nerve injury is suspected?

Answer: Ulnar nerve injury

47. What is the requirement of calories in a women during lactation in first six months?

Answer: 600 calories

48. Progesterone acts on which part of breast?

Answer: Ducts

49. Loss of migration of neural crest cells causes?

Answer: Hirschsprungs disease/megacolon

50. Which of the following is not a premalignant condition?

a. Leukoplakia b. Erythroplakia c. Oral submucous fibrosis d. Aphthous

Answer is: Aphthous ulcer

51. Which mosquito causes dengue?

Answer: Aedes aegypti

52. What is the hip and pelvic ratio in male and female?

Answer: 0.7:1

53. Insecticide of choice for kala-azar?

Answer: DDT

54. Which of the following is an amplifier host of Japanese encephalitis ?

Answer: Pig

55. A person says, I will go home...home sweet home, sweet urine....which of the following condition appropriately describes his condition?

- a. Circumstantiality b. tangentiality c. Flow of ideas d. derailment

Answer: Flow of ideas

56. What is the narrowest part of larynx in children?

Answer: - Subglottis

57. Lumbar puncture is done at which level?

Answer: L3-L4

58. Farmer's lung is caused by?

Answer: Mould hay/allergic hypersensitivity reaction

59. Which of the following is hypersensitivity reaction type II?

Answer: Pernicious anemia

60. Co-transporter of glucose in intestine is?

Answer: sodium (SGLT1)

61. Nitric oxide (NO) is derived from which amino acid?

Answer: Arginine

62. When Endometrial biopsy can be done?

Answer: ovulatory phase

63. Fluoride inhibits which enzyme of glycolysis cycle?

Answer: - Enolase

64. Which organ will be affected most in hypovolemic shock?

Answer: Kidney

65. Antidepressant drug which is used for smoking cessation is?

Answer: Bupropion (1<sup>st</sup> line)

Answer: peritonsillar abscess

100. What is the Most common symptom of nasopharyngeal carcinoma?

Answer: Mass in neck/ painless cervical lymphadenopathy

101. Chronic malnutrition can be assessed by?

Answer: height for age

102. Which of the following organs is not affected in GVHD?

Answer : eye

103. A person with AB blood group met with RTA. Which blood group he can receive?

Answer: AB

104. Lateral cutaneous nerve of arm is a branch of?

Answer: musculocutaneous nerve

105. 19 years old, primi, 8 weeks gestation, Presents with light bleeding otherwise normal. what is the Next line of management?

Answer: Bed rest

106. Diluent of BCG ?

Answer: Normal saline

107. Blood spillage on ground. How to clean?

Answer: 1% sodium hypochlorite

108. A non hypertensive lady gets fluctuated BP during her pregnancy ?

Answer: Gestational HTN

109. Feature of Hairy cell leukemia ?

???Answer: TB

110. HCG level in choriocarcinoma?

Answer: high
