

Minecraft Pocket Edition Chips off 21 Million Copies

Minecraft Pocket Edition has sold more than 21 million copies, developer Jens Bergensten announced in a tweet. To celebrate this staggering number that Minecraft has sold, the Minecraft mobile team will host live broadcasts from Mojang offices on April 14, Monday and will allow fans to ask them anything. It's their job to answer any questions.

Players can submit questions to this reddit thread. Mojang will choose the best questions and address the questions live on the internet. There isn't a date yet but it will eventually be archived. Mojang advises that you visit the website for more information as it becomes available.

Mojang wrote "We're grateful to all players for their dedication and their creativity." "Without that, Minecraft wouldn't be anywhere much as important as it is today."

Minecraft recently crossed 12 million sales on Xbox 360 and 14 million on PC. In its first month on PS3, Minecraft hit 1 million sales. In total, Minecraft has sold roughly 576 squidillion copies across all platforms. [Image: Mojang]
