THIS WEEK IN INTERGALACTIC AIRLINES

This week in Intergalactic Airlines we had our monthly meeting where we discussed many new policy changes and updates, a recording is available as always in the meeting room channel. One of the things that members expressed an interest in was more events, to that end, an event will be hosted on the 21st and more information can be found in the announcements channel. Departments were fairly quiet this week but general chat in the discord has been very strong so everyone is encouraged to join in!

THIS WEEK IN STAR CITIZEN

This week is fairly light in content. Thursday will bring another episode of Inside Star Citizen on an undisclosed topic, but likely featuring the Anvil Carrack. Friday brings a roadmap update (possibly including 4.1) and Star Citizen Live, featuring the concept artist behind the mercury star runner and the Pisces.
