Capabilities

The armed forces' primary goals are to defend territorial integrity and contribute to peacekeeping missions and civilian-support operations. Bosnia-Herzegovina joined NATO's Partnership for Peace in 2006 and a Membership Action Plan was presented in 2010. Its aspiration to join NATO has been delayed due to unresolved defence-property issues, and continuing ethnic tensions have seen the ethnic Serb community threaten to withdraw from national structures including the armed forces. The country is reforming its armed forces and modernising its equipment in accordance with its Defence Review, Development and Modernisation Plan for 2017–27 and its NATO aspirations. The armed forces are professional and represent all three ethnic groups. However, low salaries may negatively affect recruitment and retention. Bosnia-Herzegovina contributes to EU, NATO and UN missions, but the armed forces have no capacity to deploy independently and self-sustain beyond national borders. The inventory comprises mainly ageing Soviet-era equipment, though some new helicopters have been procured from the US. Bosnia-Herzegovina has little in the way of a domestic defence industry, with only the capability to produce small arms, ammunition and explosives.

Capabilities

Principal tasks for the armed forces include defending national sovereignty and territorial integrity as well as tackling terrorism and contributing to international peacekeeping missions. Croatia joined NATO in 2009, having reformed its armed forces to create a small professional force. There have been recent moves to improve conditions of service. Despite economic challenges, the 2021 defence budget exceeded 2% of GDP, with a significant proportion of the budget going to equipment investment. Zagreb has defence-cooperation agreements with Bosnia-Herzegovina, Hungary and Romania, and personnel frequently train with regional and international allies. Croatia hosts the NATO Multi-national Special Aviation Programme and training centre and participates in EU and NATO missions, including NATO's Enhanced Forward Presence in Poland. The inventory is almost entirely composed of ageing Soviet-era equipment. Modernisation objectives include the acquisition of UH-60M helicopters from the US. In May 2021, Croatia announced the purchase of second-hand *Rafale* F3-R fighters from France, after earlier US objections to the proposed sale of second-hand, upgraded Israeli F-16s to replace Croatia's ageing MiG-21s. Croatia has a small defence industry, focused on small arms, ammunition, explosives and naval systems.

Capabilities

The National Guard is focused on protecting the island's territorial integrity and sovereignty, and safeguarding Cyprus's EEZ. Its main objective is to deter any Turkish incursion, and to provide enough opposition until military support can be provided by Greece, its primary ally. Cyprus has been enhancing its defence cooperation with Greece, including on cyber defence. Nicosia has also pledged deeper military ties with Israel, while France has renewed and enhanced its defence-cooperation agreement with Cyprus. In 2018 Cyprus also signed a memorandum of understanding on enhancing defence and security cooperation with the UK. Having reduced conscript liability in 2016, Nicosia began recruiting additional contract-service personnel, as part of the effort to modernise and professionalise its forces. Cyprus exercises with several international partners, most notably France, Greece and Israel. External deployments have been limited to some officers joining EU and

Capabilities

Serbia's armed forces focus on territorial defence, internal security and limited support to peacekeeping missions. According to the 2019 national-security strategy, key threats include separatism, ethnic and religious extremism, climate change and further international recognition of Kosovo. The armed forces are modernising to address long-term capability shortfalls and personnel shortages. Priorities include procurements; improving availability, maintenance and readiness levels; and bolstering air-defence systems. Serbia has agreed to deepen cooperation with NATO through an Individual Partnership Action Plan. Belgrade aspires to join the EU but not NATO. Serbia also maintains a close relationship with Russia, from which it has received transfers of military equipment in recent years. The armed forces have reduced in size over the last decade, though annual recruitment goals are not met. The armed forces also lack skilled technicians to operate and maintain advanced systems and suffer from a shortage of pilots. However, a number of items of new equipment were on display in its *Lightning Strike* 2021 exercise, including new or improved versions of various armoured vehicles. Serbia mostly trains with its Balkan neighbours, Russia and NATO countries. It contributes to EU, OSCE and UN peacekeeping missions. Serbia's defence industry focuses on missile and artillery systems, and small arms and ammunition, but the country is reliant on external suppliers for major platforms. Serbia continues to develop its defence industry, with a focus on the aerospace industry.

TERRITORY WHERE THE GOVERNMENT DOES NOT EXERCISE EFFECTIVE CONTROL

In February 2008, Kosovo declared itself independent. Serbia remains opposed to this, and while Kosovo has not been admitted to the United Nations, a number of states have recognised Kosovo's self-declared status.

Kosovo Security Force 2,500; reserves 800

The Kosovo Security Force (KSF) was formed in January 2009 as a non-military organisation with responsibility for crisis response, civil protection and EOD. The new president has reaffirmed the ambition to develop a regular army following NATO standards and to join the Alliance, although NATO members are divided on this and the Alliance is formally against such a development. The KSF has been upgrading its capabilities to some extent, includ-

ing the acquisition of light armoured security vehicles from the United States starting in 2021. NATO has said that should the KSF's mandate evolve, it would have to examine its level of engagement with the force. The KSF is armed with small arms and light vehicles only. The NATO peace-support mission, KFOR, continues to maintain a presence in Kosovo. In March 2021 Kosovo deployed a platoon to Kuwait, where it will reportedly be under the command of the US Iowa National Guard.

Data here represents the de facto situation in Kosovo. This does not imply international recognition as a sovereign state.

Capabilities

Slovakia is trying to modernise its armed forces and replace obsolete equipment while contributing to international crisis-management missions. A defence white paper in September 2016 set out security priorities and a plan to increase defence capabilities. In 2017, the government approved a new defence strategy, a military strategy and a Long-Term Defence Development Plan. Work on a new security strategy and a new defence strategy began in July 2020 and was due to be completed by the end of the year. A NATO and EU member state, Slovakia cooperates closely with the Visegrád Group framework. Bratislava has signed an agreement to enable air policing and closer integration of air-defence capabilities. After amending the law on conscription in 2017, Slovakia began to implement its Active Reserves pilot project in order to help address shortfalls in specialist capacities, including in engineering. Results of the pilot project fell short of expectations, and Slovakia passed legislation in early 2018 to improve the training conditions for active reservists from mid-2018 onwards. Slovakia has committed to deploying a company-sized unit to NATO's Enhanced Forward Presence, serving with the Canadian-led battlegroup in Latvia, and has also contributed to EU operations and UN peacekeeping missions. Bratislava has begun to replace its small fighter and rotary-wing-transport fleets. Coinciding with the July 2018 NATO summit, the government announced it had selected the F-16, with delivery due between 2022 and 2024. There are also ambitions to replace land equipment and improve the level of technology in the armed forces. Part of Slovakia's defence-industrial base is organised within the state-controlled holding company DMD Group, including KONSTRUKTA Defence, which produces land systems. Other companies focus on maintenance, repair and overhaul services.
