MISSION

MetaShrooms is an NFT project on XRPL with unique & high quality 3D artworks.

The style is cosmic and futuristic. Our project is focusing to develop extraordinary virtual experiences in VR & Metaverse. We are fully dedicated to develop virtual - rooms where the entrance pass would be 1 META\$ NFT.

When rooms will be fully developed, visitors will be experience relaxation, mediation and possibly "trippy" experiences.

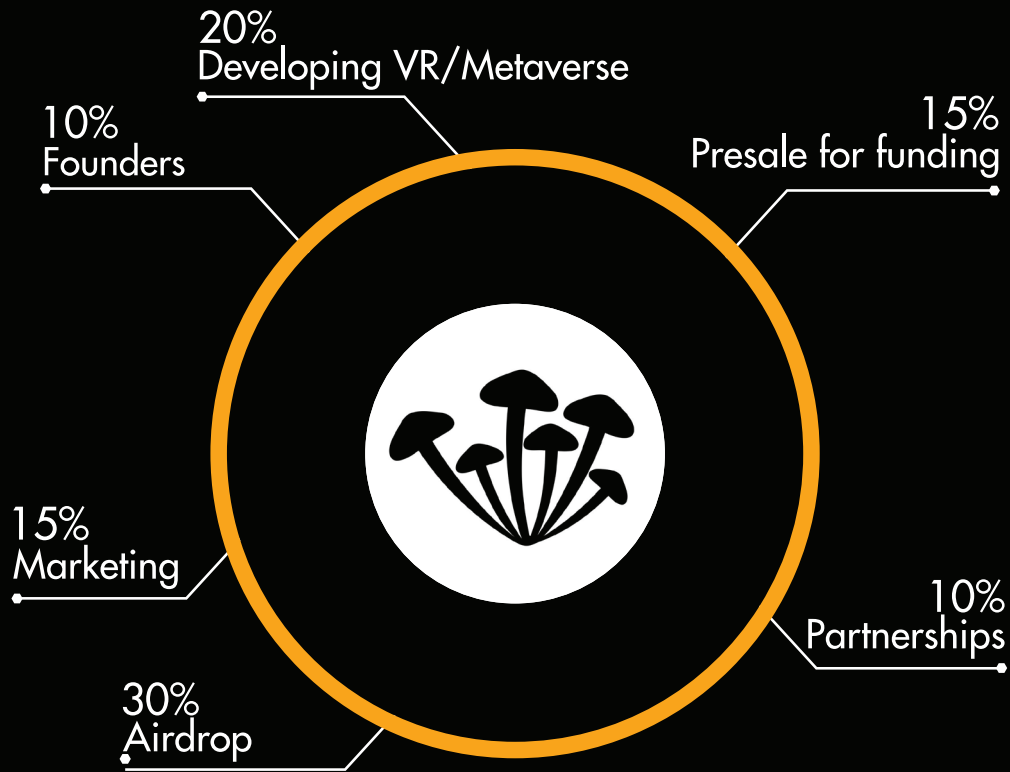

WHY XRPL

The XRP Ledger first launched in 2012 – easily making it one of the most well-tested and resilient blockchains in the history of the industry. Over the years, as the project added team members & rebranded to Ripple Labs, the XRP blockchain & the community has grown in numbers, strength & overall size.

By building on the XRP Ledger, developers can easily intergate payments into their products. Seamlessly putting money at the center of their applications. The XRPL settles transactions faster than any other blockchain. Additionally the XRP Ledger can handle up to 1,500 transactions per second.

TOKENOMICS

TOTAL SUPPLY 3333

ROADMAP

Q1

Xumm KYC - Blackhole Issuer - Website&Whitepaper - Presale - Marketing - Airdrop - Developing VR rooms - Beta testing for holders - Mint all NFT's - List NFT's to supported Exchange

Q2

Open Alpha VR Rooms - Continuous marketing - Expand to Metaverse / Open Alpha Rooms in Metaverse & - Expanding partnerships & Discover more extensions

FUTURE OF NFTS

The arrival of NFTs has changed & will continue to change “everything.” From supply chains to the medical industry. There is nothing that this new class of digital assets cannot impact. Its malleability, flexibility & capabilities are constrained only by our imaginations. It will be decades before we realize the true potential of what these non-fungible tokens are fully capable of.

One use case that will likely come sooner rather than later is around the concept of online digital identities. As we know, identities these days are managed on multiple platforms, on the offline & online at times locked with centralized companies, where the end users ultimately have no say on how their information is treated. NFTs will allow for individuals to truly manage their own identities in the digital world. Like non-custodial digital wallets. NFTs will be managed completely by the person who owns them & used in any way which they please.

DISCLAIMER

The MetaShrooms White Paper is for informational purposes only. This document is a marketing document and not intended to be legally binding. Its purpose is limited to providing relevant information to future objectives

Potential holders of the META\$ token must understand and acknowledge the risks associated with blockchain technology along with any crypto-related investments. We advise buyers to get a professional consultation before purchasing. Holding an META\$ token represents an understanding and willingness to accept the risks of spending money.

Political trends and constantly changing regulations can cause price volatility. Potential META\$ buyers must realise this responsibility and conduct a rigorous and careful analysis.
