

ELECTRONIC CAPSTONE PROJECT IDEAS

- Automated Monitoring for Household Power
- Smart Circuit Protectors for Energy Efficiency
- Empty Parking Slot Detector
- Remote Adjustment of Solar Panels
- Voice Activated Controls for Household Electronics
- Texting without Hands
- Electronic Tuner for Musical Instruments
- Overhead Lights Navigation System
- Energy Circuit Protectors
- High Temperature Electronic Applications And Devices
- Hands Free Texting
- Traffic Control
- Wireless Power Transfer: Three Dimensional Spaces
- Voice Activated To Control Devices
- Self-Switching Power Supply
- Generator Principles
- Automatic Emergency Light System
- Highway Controlling And Monitoring System
- Microcontroller For 4 Quadrant Current Motor Controls
- Induction Motor Protection Software
- Dual Tone Multi-Frequency
- Temperature Controller
- Dish Positioning Control
- Automatic Starter
- 3 Phase Fault Analysis System
- Traffic Signal Control System
- Personal Computer With Loads Control
- Current Supply For AC Machines
- RPM Displays

- Remote Household Power Monitoring
- Parking Space Detector
- Overhead Lights Navigation
- Portable Emergency Generator
- Red Traffic Light Detector
- Electric Hybrid Motorcycle
- Electronic Name Tag System
- How To Put Meter
- How Much Voltage Does House Should Use
- 60 Amps Is Required For Home Use
- How Does Electronic Affect Appliances
- Network Security And Electronics
- Electronic Engineering Technology
- Water Level Controller
- Fan Using Microcontroller
- Automatic Light Switch
- Water Level Indicator
- Metal Detector Circuit Overview
- Plant Irrigation System Importance
