Swiss Color® PMU Devices & Accessories

Highest quality and hygiene
for your daily professional use.
That's our guideline. All Swiss
Color® products follow this rule
and lead to convincing results.

Swiss Color® PMU products Devices

Devices with high standard of design as well as operability and comfort. Unbeaten in reliability and quality you will satisfy customers on your daily work with excellent results.

Besides the excellent quality, Swiss Color® offers a wide range of services, from financing to maintenance and support.

Swiss Liner TOP sensi drive

The new Swiss Liner TOP Sensi drive provides the highest level of safety, hygiene, optimal results and is a state of the art product on the market. Your work will be more enjoyable, also your creations will be more beautiful and more accurate. The new Swiss Liner TOP Sensi drive provides consistent precision at the highest level. With this device you have the opportunity to decide between multiple features. Whether you want to make a permanent makeup treatment or you choose the cool spot for the cold treatment.

With the "Sensi drive" system, it is possible to respond precisely to all skin problems. The speed of the needle punctures is automatically controlled so that an excessively deep penetration or tearing of the skin is prevented. The new, sterile packaged TOP hygiene modules provide a clean, accurate, and fast working. After all, this device works at an ideal speed and can be controlled by 4 speed levels. -2 will produce soft-looking results, whereas +2 creates sharper contours.

- "sensi drive" function measures the skin resistance
- Ideal for problem skin in cosmetic and medical area
- Cold treatment with COOL SPOT
- Compatible with the lift MESO TOP hygiene modules
- Enables you to draw finest hair
- Automatically detects the patch Hygiene module
- 50-150 needle punctures per second

ITEM NO.	NAME	TYPE OF HYGIENE CARTRIDGES
1400	Swiss Liner TOP sensi drive	TOP hygiene cartridges

Swiss Liner Advanced

The device is a state of the art product for pigmentation. Using this equipment the stylist is enabled to emphasize the natural appearance of the customer. The cosmetic studio owns with this unit a technique that allows a gentle, soft and with convincing handling long-lasting permanent make-up drawing.

The novel disposable sanitary cartridges offer a high degree of safety with regard to hygiene. During the removal of the hygienic cartridges, the needle immediately disappears into the needle jet. Thus the risk of injury with the contaminated needle, and the associated risks of infection (HIV, HBV) are avoided. A quick switch of the cartridges and the color is possible by the new cartridge system. Certified to the standards: EN55022: 1998, EN61000 -6-1: 2001, EN61000 -6-3: 2001.

You can choose your handpiece by yourself. We recommend the new TOP handpiece, which is characterized by an easy handling and a very low vibration. . All handpieces are compatible with the Lift MESO hygiene cartridges.

- 50-150 needle punctures per second (adjustable in increments of 5)
- running quietly with low vibration
- compatible with the hand pieces TOP or Classic
- 2 years warranty and product service
- ideal for problem skin in cosmetic and medical area

ITEM NO.	NAME	TYPE OF HYGIENE CARTRIDGES
1000	Swiss Liner Advanced TOP	TOP hygiene cartridges
1006	Swiss Liner Advanced	Classic hygiene cartridges

Swiss Liner Infinity

The Swiss Liner Infinity impresses with elegant simplicity and modern design. It will be an eyecatcher in your cosmetic studio. Swiss Liner Infinity is especially suitable for diverse pigmentations in the cosmetic and medical area. It provides 50-150 needle punctures per second. Due to its space-saving and handy size, this device is also ideal for mobile permanent makeup stylists.

You can choose your handpiece by yourself. We recommend the new TOP handpiece, which is characterized by easy handling and very low vibration. All handpieces are compatible with the Lift MESO hygiene cartridges.

The pigment colors can either be dropped into the module or be absorbed while the engine is running.

- 50-150 needle punctures per second
- compatible with the hand pieces TOP or Classic
- manufactured from high quality materials
- easy-to-clean surface made from brushed aluminium
- ideal for mobile permanent makeup stylists
- 2 years warranty and product service

ITEM NO.	NAME	TYPE OF HYGIENE CARTRIDGES
1001	Swiss Liner Infinity TOP	TOP hygiene cartridges
1003	Swiss Liner Infinity	Classic hygiene cartridges

Swiss Liner Symphony II

The Swiss Liner Symphony II is a high quality device that works reliably and safely. It is certified, tested and meets all hygienic requirements. It includes a hand piece, control unit, adapter and a foot pedal.

When pigmenting the needle, the Swiss Color® pigments are implanted into the top layer of skin through the incisions. Due to the adjustable needle punctures per sec of the Swiss Liner Symphony II, it is possible to treat problem skin easily too. The unit Swiss Liner Symphony II is ideal for cosmetic and medical pigmentation and Lift MESO treatments.

The pigment colors can be either dropped into the module or when the engine is running, the color can also be absorbed.

- Speed adjustable
- Very light hand piece
- No risk of infection due to the extra large hygiene cartridges
- Needle length individually adjustable
- Working with or without foot pedal possible

ITEM NO.	NAME	TYPE OF HYGIENE CARTRIDGES
1150	Swiss Liner Symphony II	Symphony hygiene cartridges

Perfectly tuned for our precision pigmentation devices our hygiene cartridges offer the highest level of security and comfort for optimal working conditions. Due to the diversity of hygiene cartridges you can do various kinds of pigmentations

in the blink of an eye. No matter if you draw fine eyebrow hair pigmentations, do a lip shading or a medical pigmentation, everything is possible with our wide range of hygiene cartridges.

Swiss Color® PMU products

Hygiene cartridge description

For the development of our various hygiene modules we use only the latest technology, high quality materials and years of experience. We know that each PMU stylist has developed his own style over time, therefore a wide range of different hygiene

cartridges is an advantage. The basis of the hygiene modules forms a medically approved plastic, the needles themselves are made of "stainless steel". The production is kept under constant and independent control in order to ensure superior quality.

1 – LINER
Suitable for eyebrow hair technique and thin lines.
Ø 0,33 mm
T C S

1 – MICRO
Even finer and more accurate than the 1er hygiene cartridge. Suitable for finest hair and fine, soft lines.
Ø 0,18 mm
T C

3 – LINER
Especially suitable for lip contour shading and firmer lines. Ø 0,33 mm
C S

3 – MICRO
Fine Eyeliner and shades for brows. The sensation of pain is reduced to a minimum by 3-needle points. Thin skin is easy to pigment with this needle.
Ø 0,18 mm
T C

3 – OUTLINE
Finer needles as 3 Hygiene cartridges. Suitable for fine eyeliner, subtle lip shades and lip contours.
Ø 0,25 mm
T C S

3 – POWER
Dense and thin lines possible. Well-suited for intense eyebrows, eyeliner and lip contour. Power needles carry more color per insertion. Ø 0,33 mm
C

3 – SLOPED
The slanted needles are always at the same depth in the skin, so that the color stays evenly in the skin, providing more reliable holding in the skin. Suitable for eyeliner, lip and eyebrows. Ø 0,33 mm
T C S

4 – FLAT
It is for large shading areas like lip shading and areola pigmentations. Ø 0,33 mm
C S

5 – ROUND
For lip shading, wide contour of the lip, areola pigmentations, corrections and intensive broad eyeliner. Ø 0,33 mm
C

5 – SHADER
For lips or eyebrow shades or generally full shades.
Ø 0,33 mm
T C S

5 – POWER
Thick and thin lines are possible, suitable for broad eyeliner and for wide lip contour. Power needles carry more color per insertion. Ø 0,33mm
C

5 – MAGNUM
Is a flat needle system. For lip shading, areola and hair thickening. Ø 0,33mm
C S

5 – SLOPED
Due to the 5-fold amplification, the module is for the lips, and for a wide upper eyeliner. Ø 0,33mm
C S

7 – ROUND
Is used for areola pigmentation, big lip surfaces and hair thickening. Ø 0,33mm
T C S

7 – POWER
Density and wide lines possible. For broad - stroked eyeliner, wide lip contour and hair densities.
Ø 0,33mm
C

9 – MAGNUM
Used for areola pigmentation or hair thickening.
Ø 0,33mm

This overview will provide a good start for the use of our hygiene cartridges for the various possible applications in the permanent makeup field. You will also learn to apply the various hygiene cartridges according to the task. If you are not sure what type

of cartridge you need, we recommend a Swiss Color® training program. With the support of experienced trainers you will be trained to experienced specialists in a short time.

COOL Spot

COOL Spot is a cold treatment before or after a PMU application. The aluminum top cools and provides soothing, calming cold. Hematoma and swellings get reduced. The sensation of pain gets reduced and the lymphatic flow minimized. The incorporation of the pigments and the healing process will be encouraged.

ITEM NO.	NAME
1007	COOL Spot for SL Advanced
1398	COOL Spot for SL TOP sensi drive

Hygiene hand piece TOP + TOP sensi drive

The extremely light weight hand piece fits comfortably in your hand and is very quiet. Finer, faster and more accurate results are guaranteed by the newly developed engine, which has a function to recognize the used hygiene module. The sensi drive function measures the skin resistance (hygiene module recognition and "sensi drive" only works with SL TOP sensitive drive control unit).

ITEM NO.	NAME
1397	Hygiene hand piece TOP (for Adv. / Inf.)
1399	Hygiene hand piece TOP sensi drive

Hygiene hand piece Classic

The straight handpiece Classic is light, lies nicely in the hand and runs very quietly. You hardly feel any vibration and it does not heat. This hand piece Classic is compatible with our precision pigmentatin devices Swiss Liner Advanced and Swiss Liner Infinity.

Swiss Color® PMU pigments

The heart of all PMU treatments are the pigments. We offer high quality pigments for the various applications to convince you and your customers.

The heart of all PMU treatments are the pigments. We offer for the various applications high quality pigments to convince you and your customers.

We only use fully synthetic pigments of which the quality of raw materials (according ResAP 2008/1) is guaranteed and run further tests by independent accredited laboratories. We have MSDS Material Safety Data Sheets about the ingredients available. Swiss Color® pigments contain no hazardous AZO dyes, no PAH = polycyclic aromatic hydrocarbons, no heavy metals, and no hazardous aromatic amines including NDELA = Nitrosodiethanolamine. New in our color range are the OS pigments, which are additionally free of iron oxides.

Swiss Color® PMU Pigments Pigments

A very good overview of the different shades offers our color chart. In our online shop you will find a detailed description of each pigment color, if you want we can send it to you by e-mail as well. All of our pigment colors are ready to use and are mixing very well with each other. But only mix colors from the same pigment group (do not mix OS pigments with SC pigments!). Due to the high pigment content our colors have a very good durability in the skin. For the correct application of Swiss Color® pigments we offer special color courses, because it is very important to choose the appropriate pigment for every different skin type.

For more information about the Swiss Color® pigments please visit our website: www.swiss-color.com

Swiss Color® OS pigments new

New in our product range is the series of OS pigments. Special about these colors is that they are totally free of iron oxides. The OS pigments are very opaque, color stable and have a stability. Due to the high pigment density the colors look very real. The treatment time is shortened and costly rework is eliminated.

The base colors Honey I & II

The base colors Honey I & II mainly consist of golden-yellow pigments, whereby Honey I is cooler and Honey II is warmer.

For eyebrows: The addition of Honey II causes softer results for dark-browed colors. You can, depending on the added amount of Honey I & II downgrade all brown colors until gold blonde types, nearly authenticity effects are achieved.

For lips: Honey I & II make it possible with its high proportion of gold yellow pigments to lighten up all lip tones, to give them a smarter look. The tones can be customized according to the mixture ratio in warm softer or cooler tones.

For areola: The base colors for almost all areola colors is Honey I & II. With the addition of Blush, Melba and Diana in small quantities, the color will find the right character. Shadowing can be optimally adjusted by smallest mixture ratios. The breast receives a natural areola which looks almost real.

 Please notice, that the color sample reflects the pure brilliance and consistency of Swiss Color® pigments. The actual effect of the color depends on the respective skin type.

Swiss Color® PMU pigments

Additives

With the Swiss Color® additives, it is possible to counteract various skin problems. Effortlessly you can, for example, treat scars. The pigments can thereby be incorporated quicker and

easier into the skin. The easy handling of the Swiss Color® additives results in a perfect permanent make up result.

Gigaplast

Gigaplast is an antibacterial sealer to apply on the pigmented area after the treatment. It prevents bacteria to enter and the crust comes lower. With Gigaplast, the colors are kept better in the skin. Application: Apply the gigaplast with a microbrush on the lips or brows. After 2-3 hours the gigaplast can be dab off with an cleansing tissue.

Transponder

The Transponder prepares the skin to become very elastic and makes it fit for treatment within a few minutes. Transponder is especially suitable for scar tissue and callus skin. The skin gets very smooth, does not rip anymore and even gathers the color easier. Especially suitable for scars and skin with firm structure.

ITEM NO.	SIZE
001	12 ml

ITEM NO.	SIZE
002	12 ml

Thinner

The thinning of permanent make up colors plays a crucial role. Fat content, pH value, alcohol concentration and additives are essential for a good effect. The tuned recipe is ideal for the pigments and protects them against dehydration.

Driver

The driver makes the pH value of the skin neutral and "drives" the color into the skin. Apply the driver with microbrushes, start with the pigmentation, repeat after about 20 min. The driver is matched to the SC pigments. Not for OS pigments.

Swiss Color® PMU pigments

Mixtips

You get the best PMU results if you respond to the wishes and needs of your customer. Therefore a high level of understanding of the mixing behavior of the different colors is necessary. The color wheel offered below is a very useful tool. With this you can already test your mixtures in advance.

Please note that endogenous pigments plus color pigments lead to the effective color. All Swiss Color® pigments can be mixed together but we recommend to mix not more than 3 different pigments.

Eyebrow

Swiss Color® PMU accessories

A wide range of selected accessories completes your high quality Permanent Make up treatment offer.

Swiss Color® PMU accessories Aftercare

The proper post-treatment care products are crucial for the healing phase and for the durability of the pigments in the skin. Only the correct aftercare treatment will guarantee satisfying permanent make up results.

Cream Grazia

The customer should apply the cream on the affected area 2-3 times daily, over a period of approximately 10 days. The care cream is a semisolid W/O emulsion with a water content of about 30%. The vitamin E content makes sure that your lips stay soft and do not rip during the healing phase. We offer the Cream Grazia not only in small containers of 5 ml but now also with 250 ml. As well, it is very suitable to remove excess color during the pigmentation from the skin of your customer.

ITEM NO.	NAME	PCS./PAC	SIZE
1216	Cream Grazia	27	5 ml
1216-e	Cream Grazia	1	5 ml
1042	Cream Grazia cabine	1	250 ml

Cream Silver Complex

The cream "Silver Complex" prevents the formation of crust after lip pigmentation. It helps against redness, the customer feels less tension on the treated area and the itching, caused by the healing, gets reduced. Tests have shown that after using Silver Complex for 2 days the skin has greatly improved. The silver ions are antibacterial and can prevent against the outbreak of herpes during the healing.

ITEM NO.	NAME	PCS./PAC	SIZE
1307	Cream Silver Complex	12	5 ml

Cooling pads

Use our cooling pads for cooling before or directly after the treatment (e.g.: eyeliner, lips ...). We recommend giving them to your customers (to take them home) for the reduction of any possible swelling after the treatment.

Swiss Color® PMU accessories Aftercare

SC Lip Balms for brow and lips

For pigmented lips, we recommend this lip balms with SPF 15 as aftercare. The sun makes the pigments fade faster and by regular application of the lip balm, the pigments are maintained and last longer in the skin.

The extracts of *Cardiospermum halicacabum* support the cell regeneration. Out of a high quality moisturizer, enriched with tripeptides, it gives the lips a smooth feeling and volume.

The SC naturebalm is colorless, the SC lipbalm has a red color.

HerpoTherm®

The HerpoTherm® is a medical device that can prevent the development of cold sores at the appropriate time.

There are no more annoying, unsightly sores and no soreness around the lips. Especially recommended for customers who wish a permanent makeup drawing, but are prone to herpes.

By electrical impulses and heat in the range of 50-51 ° C the formation of blisters can be prevented at the appropriate time. Also other symptoms such as tingling, burning, itching, tightness and pain can be prevented easily. By heating the infected herpes virus cells, a partial or complete denaturation of enzymes or proteins can be achieved. The multiplication of the virus is thereby prevented. The development of cold sores can be stopped.

- For the topical application of cold sores
- Works without chemicals by concentrated heat
- Prevents the outbreak at the appropriate time completely
- Suitable for pregnant women, epileptics and persons suffering from allergies
- HerpoTherm® is dermatologically tested

4 Lift MESO Concept

The Lift Meso Concept is a new and very effective treatment for the regeneration and rejuvenation of the skin.

To look years younger - the Lift MESO Concept is a new and very efficient method for the regeneration and rejuvenation of the skin. The skin is smoothed and additionally hydrated. Then gently active substances (hyaluronic acid) is introduced with the especially for this developed Lift MESO cartridge. The active ingredients provide the skin with moisture and stimulate the regeneration of collagen and elastic fibers.

In 7-day intervals 5 treatments are carried out, each lasting about 30 minutes and every 3-6 months the treatment has to

be repeated. The best results are achieved for tired, stressed skin and fine wrinkles. After a detailed skin analysis, you decide with your client the most suitable serum. The treatment is particularly effective and pain-free! Effectiveness and efficiency of the Lift MESO Concept show after just a few applications and you will be impressed by the immediately visible results.

Lift MESO hygiene cartridges are compatible with the devices Swiss Liner TOP sensi drive, Swiss Liner Advanced, Swiss Liner Infinity, Swiss Liner Symphony and Swiss Liner H.

Lift MESO Starter package Professional

Lift MESO Concept Highly Active Sera

The Lift MESO Concept consists of the Lift MESO treatment and and care for at home to support and strengthen the treatment. We offer three different active substances:

Tissucare

Highly active serum for stimulation and stabilization of the tissue

Tissucare is a highly active serum that supports the tissue structure of the skin. The hyaluronic acid (3-fold hyaluronic) infiltrates deep into the skin and backfills the skin from the inside out.

ITEM NO.	QTY.
1163	100 ml

Trophocare

Highly active serum for the reduction of wrinkles and fine lines

Trophocare stimulates the collagen production and therefore also a reduction of facial wrinkles. A combination of hyaluronic acid, Genistein and Diosgenin stimulates the cell division and cell production. Matrixyl, an approved collagen booster, stimulates the production of Collagen I, II, III and IV. Agriline and Synake counteract facial wrinkles, as well as Spilanthol.

ITEM NO.	QTY.
1164	100 ml

Eyecare

Highly active serum for the reduction of eye bags

Eyecare is a highly active serum to reduce puffiness, eye bags and dark pigment deposition in the eye region. Eyecare consists of a 3-fold hyaluronic acid, with an emphasis on low molecular weight hyaluronic acid, in order to ensure deep infiltration.

ITEM NO.	QTY.
1165	30 ml

Lift MESO Concept Products

Lift Meso hygiene cartridges

The Lift MESO hygiene cartridges consist of a hygiene plate with 18 stimulation points. They enable an effective excitation of the epidermis and the pain-free introduction of the highly active serum into the skin. 13 small holes provide the exit of the Lift MESO substances (hyaluronic acid).

ITEM NO.	NAME	PCS./PAC
1184	Lift MESO TOP hygiene cartridges	8
1162	Lift MESO Classic hygiene cartridges	8
1158	Lift MESO Symphony hyg. cartridges	8

Glycolic-A

Glycolic-A is a high quality fruit acid peel from the Sugarcane. The Glycolic-A fruit acid (10 % or 20 %) makes the pH value of our skin sour. Thereby it is possible to solve even strong calluses. The skin becomes firmer, smoother and gets an even complexion (do not forget the neutralization afterwards).

ITEM NO.	NAME	pH-VALUE	QTY.
1167	Glycolic-A 10%	1,9	100 ml
1171	Glycolic-A 20%	1,6	100 ml

Hyaluronic Lift up

For the daily support of the rejuvenation of your skin. The hyaluronic acid (3-fold hyaluronic) with emphasis on of low molecular weight hyaluronic acid penetrates deep into the skin and replenishes the skin from the inside out. Small lines are rapidly reduced and the skin appears firmer and smoother. Apply twice daily, in the morning and in the evening.

ITEM NO.	QTY.
1166	30 ml

Neutralizate-A

Use Neutralizate-A to neutralize all acids (fruit acids, Glycolic acids, salicylic acids).

ITEM NO.	QTY.
1168	200 ml

Anti-Wrinkle

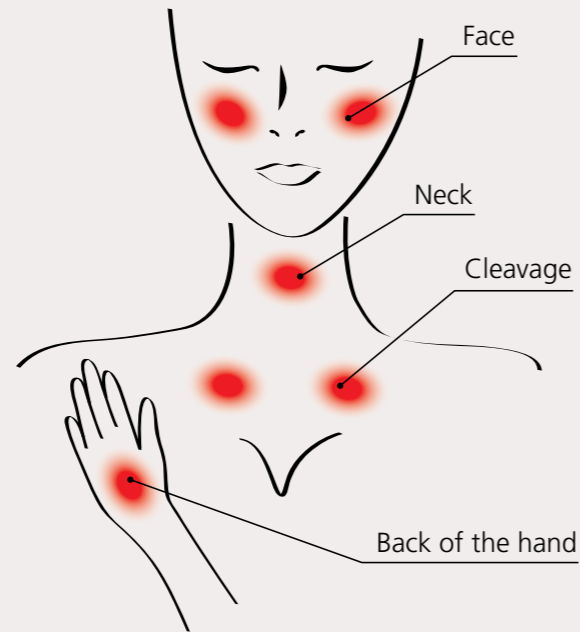

The basis of this mask is the kelp algae from the North Sea. Mix the powder with water. The mask has a muscle relaxant and hydrating effect.

ITEM NO.	PCS.
1185 Mask á 40g	4
1186 Mixing bowl	1

Treatment areas

The Lift MESO Concept is a new and very effective method for skin regeneration. The following areas can be treated with high impact:

- Frown lines
- Forehead Wrinkles
- Eye area
- Lip area
- Cheek area
- Nasolabial fold
- Neck
- Cleavage
- Back of the hand

Process of treatment

1. CLEANING

The base of each Lift MESO treatment is a clean face. Therefore, before each treatment make a Glycolic peeling, let it sit for about 7 minutes, and afterwards neutralize with the Neutralizer.

2. APPLICATION

Apply the active substance on the areas which have to be treated. It is important never to work on dry skin! You can also fill the Lift MESO serum in the aperture of the Lift MESO hygienic cartridges.

In order to achieve a good result, we recommend you to set your Swiss Liner on the speed level 70-80. Treat the areas with gentle pressure from below to above and repeat approx. 3-5 times.

3. AFTERCARE

After finishing the treatment massage the serum gently into the skin and leave it for about 5 minutes. Mix the alginate powder with lukewarm water (about 130 ml of water, about 20°C).

Finally, apply the Anti-Wrinkle Mask, wait 10 minutes until the mask is fixed and remove it as well as the excess with a cool compress.

Examples for treatments

For a single Lift MESO treatment we recommend a period of approximately 30 minutes, and for combined treatments about 40 minutes. Each treatment begins with a Glycolic-peeling and the following Neutralizer for a thorough cleaning of the skin. To get the best result, we recommend you to perform 5 treatments at intervals of 1 week.

Tissucare

To tighten the tissue in the neck and cheek area, including anti-wrinkle mask.

DURATION
appr. 40 min.

Trophocare

To reduce wrinkles around the mouth, the cheeks, the forehead, eyes, including anti-wrinkle mask.

DURATION
appr. 40 min.

Eye Care

Reduction of puffiness and dark pigment deposition in the region of the eye contour.

DURATION
appr. 30 min.

Combination treatments

In order to expand your range of treatments and to address the specific needs of your customer, we also recommend to offer the combination of treatments. As a consequence, even better results are achieved.

Reduction of wrinkles and eye care

Effective treatment combination for the reduction of facial and neck wrinkles as an eye treatment, with subsequent anti-wrinkle mask.

DURATION
appr. 50 min.

Tightening of the neck tissue and facial wrinkle treatment

To tighten the tissue in the neck and cheeks, with a final Anti-Wrinkle Mask.

DURATION
appr. 50 min.

For your client

For best results we recommend to apply the Hyaluronic Lift up serum 2 times daily (morning and evening).

Hyaluronic Lift up

To support the rejuvenation process of your skin. Small wrinkles reduce very quickly and the skin looks firmer and smoother.

ITEM NO.	QTY.
1166	30 ml

1. GENERAL

- 1.1 Any deviations from these sales conditions – especially the application of the conditions of purchase of the customer – shall require an explicit written approval by our side.
- 1.2 Offers shall always be subject to confirmation. Commissions and orders are only binding to us in so far as we confirm them or comply with them by delivery of the goods. Supplementary agreements are only valid if we confirm them in written form.
- 1.3 By using delivered goods, the customer shall provide an assurance that no third-party rights are infringed.

2. DELIVERY

- 2.1 In so far as we provide our own packaging and means of transport, our special packaging conditions apply.
- 2.2 As long as the customer has outstanding liabilities, our duty of delivery is suspended.
- 2.3 In case of a delay of an agreed-upon delivery date, default in delivery is only given after an adequate extension of the time limit.

3. CALCULATION

- 3.1 In the absence of differing agreements, delivery is meant ex works, without packaging.
- 3.2 Calculation is always based on the prices effective on the day of delivery. If these are higher than in the agreed contract, the customer is entitled to withdraw from the contract with respect to the not yet received quantities within 8 days of the communication of the price increase.
- 3.3 The prices are exclusive of VAT.
- 3.4 If carriage-free delivery is agreed on, our quoted prices are based on the carriages and additional charges effective at the time of the offer. In case of changes respecting the carriage and additional charges, our prices of delivery will be adjusted either for the benefit of the customer or at the customer's charge, without giving the customer the right to withdraw from the contract.

4. FORCE MAJEURE

Circumstances and incidents which cannot be prevented by the care of a proper management are considered to be Force majeure. They suspend the contractual duties of the parties for the time of the interference and to the extent of its effect. If resulting delays last longer than 6 weeks, both parties are entitled to withdraw from the contract with regard to the affected services. No further claims can be made.

5. PAYMENT

- 5.1 Devices and basic equipment shall be paid by prepayment.
- 5.2 Our invoices are due for payment and payable post-free without any deduction within 14 days of the invoice date. In case of default, apply 10% per annum default interest. All the prices are exclusive of VAT, prices are subject to change.
- 5.3 Generally, online orders are to be paid by prepayment, paid on delivery (only in Austria and Germany), or by means of a debit entry.

6. SHIPMENT

The delivery charge for Austria is € 6,-, for Germany € 8,- and for other EU countries € 15,-. For orders over € 300,- (excl. VAT) no shipping costs will be charged. For delivery by EMS (24-hour Express Mail Service) the delivery charge is € 15,-. There is no delivery charge for the first order. The actual shipping cost will be charged for deliveries outside of the EU. For shipments to EU countries no VAT is charged when a VAT identification number is quoted. Loading and dispatch are effected at the risk of the receiver and without any insurance.

7. WARRANTY

- 7.1 All information about suitability, use and application of our products, technical advice and other information are given to the best of our knowledge. Nevertheless, they do not excuse the customer from own tests and trials.
- 7.2 The customer has to inspect the delivered goods without undue delay for defects regarding texture and desired usage within the bounds of what is reasonable even through a sample usage. Otherwise, the respective delivered goods shall be deemed as approved.
- 7.3 Complaints will only be taken into account if they are made within 8 days after receiving the goods in written form and with supporting documentary proof enclosed. Hidden defects have to be complained about in the same form directly after their discovery, though the latest 6 months after receiving the goods.
- 7.4 Our warranty obligation is limited to replacement, exchange, reduction or repair at our choice. Goods that are subject to a complaint may only be returned with our explicit consent.

8. COMPENSATION

As far as legally permissible, our obligation for compensation, based on any cause in law whatsoever, is limited to the billing value of our goods which are directly involved in the damaging incident. This does not apply if we adhere to the legal requirements in the case of intent or gross negligence on our part.

9. RESERVATION OF OWNERSHIP

- 9.1 Until the complete payment of all accounts receivable under the business relationship, the delivered goods shall remain our property.
- 9.2 Access and claims of a third party to the goods still remaining our property, have to be communicated to us immediately by the customer via registered letter.
- 9.3 Making use of the reservation of ownership does not represent a withdrawal from the contract.
- 9.4 Prior to complete payment of our claims, the goods and the claims that replace them must not be pawned, transferred for security or otherwise ceded to third.

10. PLACE OF PERFORMANCE AND PLACE OF JURISDICTION

The place of performance shall be the respective place of dispatch. Austrian law applies as agreed upon. The place of jurisdiction for all disputes arising from or in connection with the business relationship shall be BG Kufstein.
