

# Test And Anavar Cycle Review + Dosage (All Test Types)

Yes your doing it backwards, for sure you should start the hgh first 2-3 months to get it working its best. Than add test for weeks 1-8 than finish weeks 9-12 or 16 adding the anavar. Sent from my iPhone using EliteFitness app. There is no logical way to the discovery of these elemental laws. Anavar helps to get you ripped by reducing thyroid-binding globulin and it also helps to promote clean, dry muscle gains. The half-life of Anavar is only around 8 hours. For that reason, it should be dosed 1-2 times per day to maintain a constant supply in the bloodstream.

Weeks 1-10 Nandrolone Phenylpropionate - 400 mg a week. 100mg on Monday, Wednesday, Friday, and Sunday. Weeks 4-12 Anavar (Oxandrolone) - 4 weeks after first injection. 50-75mg ED. Spread out throughout the day. Weeks 1-16 - On Cycle Therapy HCG - 1000IU's a week spread out through 4 injections. 250IU's on Monday, Wednesday, Friday, and Sunday. 📌

## anavar and hcg only cycle - Steroid com

Even with test, I wouldn't think he'd get much out of a 6 week cycle, unless he ran the test 12 weeks yeah 12 weeks would be best . if he blasted Test prop at 150mg EOD with 80mg a day of VAR for 6 weeks he'd get some decent muscle fullness and hardness, but not a whole lot of real tissue growth that will transfer over to keepable gains 🙄

## Anavar Cycle: How to Maximize Your Gains & FAQ - Inside Bodybuilding

Anavar & Test Beginner Cycle. This cycle may be taken after an Anavar-only cycle. This cycle will greatly enhance muscle building and strength gains, compared to taking Anavar alone. These are conservative doses, and thus suitable for someone with little experience using anabolic steroids.

## HCG Help with Test E, Anavar 10 Week Cycle - Pharma - Forums - T NATION

The following Anavar cycle can be used by any man, as Anavar is one of the mildest anabolic steroids on earth: Week 1-12 - 100mg/eod Testosterone Propionate. Week 1-12 - Clenbuterol at 40mcg/ed week 1-2, 60mcg/ed week 3-4, 80mcg/ed week 5-6, 100mcg/ed week 7-8, 120mcg/ed week 9-10, 140mcg/ed week 11-12. Anyways, the cycle I am looking at doing next is solely for strength purposes and is as follows: wk 1-10 Test E, 250mg 2x/wk wk 4-12 HCG wk 1-6 Anavar, 50mg ED for kick start OR run it wk 5-10 to finish off the cycle (how much will the end result change?) PCT week 12-16. PCT [💎](#)

## Anavar HCG Cycle, thoughts | MESO-Rx Forum

My first ever cycle was Anavar and HCG and i got good results,maby because it was my first cycle but i was happy with the results.The cycle was 8 weeks long and i recoverd fine without PCT.The only good thing i can say about using the HCG was it keeps your balls working even though it shuts down the rest of your system. Having said that i agree with Skywalk and would use test instead of HCG. [view publisher site](#)
