

Blaze Black Volt White²

LEVEL UP MOVE CHANGES

One of the main features of Blaze Black 2 and Volt White 2 is the changing of some of the moves the Pokémons learn by level up. Most of these changes are done either for convenience reasons, because a Pokémon is missing a move that it probably should have gotten (Flareon is a notable offender...) or because a Pokémon's type has changed and it needs some changes to its moveset in order to fit within that type better. Refer to the next page for the key on how to read this document, as well as the changes I've done to some of the individual attacks. Not all 649 Pokémons have had edits to their move pool, but it's sure as hell not far off!

Almost everything contained in this document is missing from the Vanilla version of the hack. The exception is the compatibility with the replacement TMs newly placed in the game; information on this is found on the next page. Level up moves and attack changes are totally absent.

General Attack Changes

- Pin Missile is now 25 power.
- Spike Cannon is now 25 power.
- Comet Punch is now 25 power.
- Arm Thrust is now 25 power.
- Incinerate is now 50 power.
- Struggle Bug is now 50 power.
- Steamroller is now 75 power.
- Power Gem is now 80 power.
- Shadow Claw is now 90 power.
- Needle Arm is now 100 power.
- The three Pledge moves are now 100 power.
- Cut is now Grass-type with 60 power and 100% accuracy, with 20 PP.
- Strength is now a Rock-type move, but has been reduced to 75 power.

It is also worth noting that some new TMs have appeared, or rather, replaced some of the old ones.

- TM58 previously contained Sky Drop; it now contains Hurricane instead.
- TM60 previously contained Quash; it now contains Sucker Punch instead.
- TM76 previously contained Struggle Bug; it now contains Bug Buzz instead.

Document Key

- + means the move is totally new to the level up set.
- means the move has replaced the move usually learned at that level.
- = means it's not a new move, but the level has been shifted.

There may be some changes that have been written in sentence form that don't quite correspond to the key; in this case, disregard the key and take the sentence for what it says.
