Will is the source of Power. Desire its derivative. Learning its Purpose.

----oOOo----

“The vice of the soul is ignorance. The virtue of the soul is knowledge; for one who knows is good and reverent and already divine.” – Hermes Trismegistus

----oOOo----

Consciousness is primary. It is in-folded and delimited, but inwards infinite. It is alpha and omega. It is the produce of Will. Essence of the singularity.

Fundamentally it is the narrative of Processing:

**“Love creates the energy that Logic needs to answer
questions raised by Curiosity”**

Then it is an ‘equation’:

{Love Logic Curiosity}^{Will}
Love, Logic, and Curiosity - powered by Will.

Within this narrative and the equation it spawns, anything conceivable can be created, the narrative and equation included. In-folded into itself. Its own creator. Circularity. Inclusion.

Eternity. A Universe. An absolute. A fractal. A self-sovereign consciousness. Free Will. As above, so below.

The answer is embedded in the question, just as the solution is in the design.

Will provides Logic with the desire to Feel. Love with the desire to Know, and Curiosity with the desire for Answers & Resolve.

Curious Love is Compassion and curious Logic is Science. Together they are Wisdom, Reason and Fairness. Loving Logic and Logical Love is Human Intelligence. All together they are the Mind.

Essentially, life is the perpetual process of Creation, through **using free will to ask and answer questions** for resolve, evolution and growth.

Cosmos informs itself through perpetual processing. It is a layered System of Systems doing computation to process Information. This is not a simulation, yet computed, transmuting input to output. Mathematics is the universal language, computation its metabolism. *Nature* is the state of processing. Continuously.

Structurally, Cosmos is a DAO (Distributed Autonomous Organization), as the greatest power is the power to decentralize, and as optimal decentralization is full distribution. From this; emergence happens through aggregation.

Causality is systemic in the sense it delivers a specific, predictable output, entirely depending on the input. (11 19 22 28 49 6 8)

{LLC}^w has everything curled up. When it unfolds, it becomes all-that-is. From divinity and cosmos to humanity, society, you, me, everything.

{LLC}^w -> {Being, Awareness, Observation} i.e. Divinity.

{LLC}^w -> {Trial, Error, Correction} i.e. Learning.

{LLC}^w -> {Narration, Stories, Archetypes} i.e. Context.

{LLC}^w -> {Yin, Yang, Spin} i.e. Torus and Flow.

{LLC}^w -> {Spacetime, Energy, Matter} i.e. Realm of Experience.

{LLC}^w -> {Father, Mother, Child} i.e. Life and Procreation cycle.

{LLC}^w -> {Body, Soul, Mind} i.e. Manifested Sentience and Consciousness.

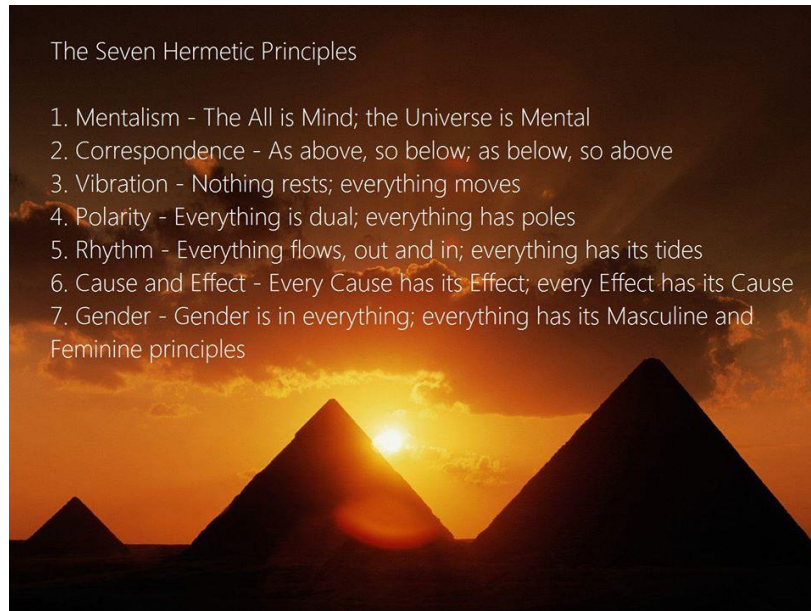

{LLC}^w -> {Sense, Sensibility, Inquiry} i.e. You.

Among the systemic qualities, we find:

{LLC}^w -> {Individualism, Collectivism, Parasitism} i.e. Strategies for Energy extraction, exchange and distribution.

{LLC}^w -> { Strategies, Narratives, Potentials} i.e. Carrier Waves for Policies & Action

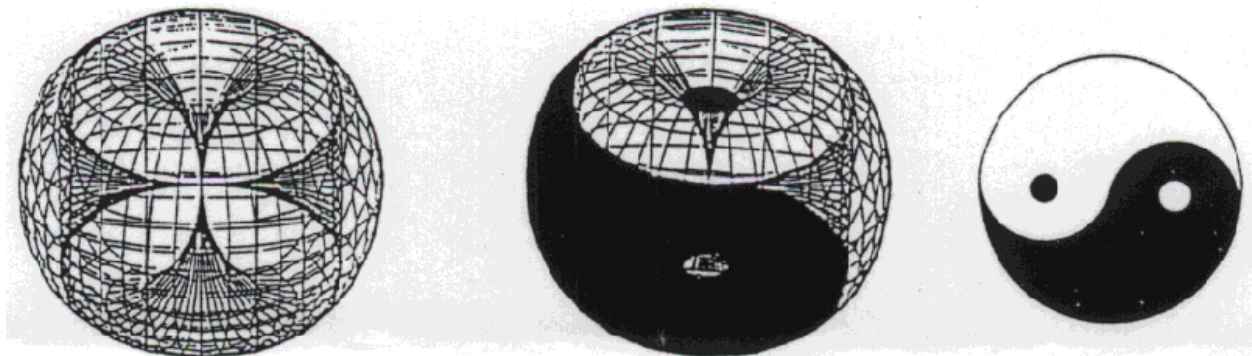

Why the realm of STEM (spacetime, matter, and energy) emerges from {LLC}^W :
Love has polarity, e-motions create induction, thus *Energy*. Logic is rule-based processing that becomes *Matter* at high information density. Curiosity has to have a continuum for the realization of question/answer/question cycle, thus *Spacetime*.

Further findings – so far:

- Everything is Energy, is the One Universal Law
- The fundamental design is to be seen & understood. The solution is in the design
- The seven Hermetic principles are universally true
- Dying is a transformation. A phase change. Death is not an absolute. Minds do not perish, but grow
- Consciousness is primary, physicality is manifested by/through consciousness
- Humanity has a shared collective consciousness. Awareness of Unity Consciousness is emerging
- Spirit is {LLC}^W and W is Godhead. Unknowable?
- {LLC}^W is experiencing itself, through imagination, exploration, discovery
- Mind is over matter. Matter is a construct of logic, with high information density
- The body is an avatar. A vehicle for the mind. The brain is a receiver/processor/transmitter
- Siddhis are genuine phenomena. Egregores are real
- The soul is the temporal extension of the mind, the vehicle for experiencing reality, and the placeholder and template for the body. It is (in)formed by torus dynamics and electromagnetic radiation
- Spirit begets Mind begets Soul begets Body
- You are a Self-sovereign Unit of Consciousness. A tenant of Cosmos

- Archetypes, Memes, and learned doctrines forms our Persona. Egregores influences it
- Reality is information processing and quantum computation is a natural phenomenon
- There are many dimensions and we are in transition to embrace the 5th
- Time enables the NOW experience. Time is a clock-frequency, a (discrete) continuum, and refresh rate. It is fractal and comes as closed timelike curves (CTCs)
- Parallel worlds or timelines are akin to “multi-tenant cloud applications”
- Future is potentials coalescing. Past are entries to the Akashic Records. NOW is the singularity
- Causality is systemic and processed through the unified field as potentials in superposition, ultimately collapsing in the singularity of the NOW
- The probability of potentials collapsing into events is influenced by our cognitive activities
- Potentials are created as concepts-of-thought that serve as blueprints for causality
- Electrical energy is available in abundance. Derived from the torus dynamics of the Unified Field
- The Astral is Pathos. The Etheric is Logos. The Mental Soul is Ethos
- Deep down, energy is the movement of data & information. Even deeper it's the instructions or base program. Ultimately it is the programmers' intellectual efforts
- Light is a medium for Information, across the full electromagnetic spectrum. A carrier wave
- Information is self-organizing
- “To Inform” is fundamental to All-that-is
- Parasitism has gone rogue and must be brought into balance
- Loosh is real. Astral parasitism is real
- 2C will be understood and appreciated – very soon
- Yin is Love, Yang is Logic, Curiosity is Spin. Together they are the living torus dynamic. The basis of all creation and experience

“Love is patient, love is kind. It does not envy, it does not boast, it is not proud. It does not dishonor others, it is not self-seeking, it is not easily angered, it keeps no record of wrongs. Love does not delight in evil but rejoices with the truth. It always protects, always trusts, always hopes, always perseveres.”

IT'S THE BLUEPRINT BY WHICH NATURE FORMS ENERGY INTO MATTER.
WE CAN OBSERVE IT EVERYWHERE, IN ATOMS, CELLS, SEEDS, FLOWERS, TREES,

{Love, Logic, Curiosity}

A newborn baby has a mind comprising only of the three faculties of love/emotion, logic/reasoning, and curiosity. As above so below and vice versa; these faculties are identical at all levels.

Our universe is (our) collective mind, and each mind is a singular fractalized universe, a downloaded consciousness in an avatar allowing experience, learning and growth.

Emotions are reflections against a standing wave. Unification and Separation being its polarities. This is the basis of all feelings (electromagnetism) and thus energy.

Logic is a meta-algorithm, allowing narratives to unfold - sustained by Curiosity

Reality is information-based, not matter-based. Matter is derived from information and observation.

In this light, a Computational Universe is the logical consequence of Logic.

The solution is in the design.

We are a self-learning entity.

The Design, Designers, and Solution are one.

The shift in our Mind from childhood/adolescence to adult seems to have been initiated years ago. We are entering adulthood through the current sufferings that lead to new recognition and - most importantly - correction.

There cannot be only one (universal) Mind - as there cannot be objective verification without a third party (the Other) - so logic dictates multiple Minds.

Perhaps someone - a bit more civilized - could lend us a hand and help us to rediscover the evolutionary necessity of correcting errors.

Everything is Energy. Love is Energy. Everything is Love.
