

Congressional Survey of Accountability, Truth, and Freedom From Service Members Facing the DoD's Vaccine Mandate

Enclosure 4: Basis for Medical Exemption Requests

*If you would like to receive the unredacted version of this survey, contact any of the service members who took the survey (besides those who wish to remain anonymous), or have a copy of the raw data, please send your request to Congressional.Survey.ATAF@protonmail.com, the Congressional Survey for Accountability, Truth, and Freedom (ATAF) from your official .house or .senate email.

Service members to list the basis for the medical exemptions that they have requested from the COVID shot where it has shown to be next to impossible to get an exemption approved from the DoD. Here is a graphical depiction and further broken down in their responses below:

Basis for the medical exemption:

2x medical exemptions requested (initially natural immunity) Submitted 23 Feb 22, denied 3 March 22. Lack of supply exemption approved 1 June 22, REVOKED 2 June 22.
Adverse reaction to a previous vaccination.
All above except female related.
Allergic to Anthrax Vaccine and have endometriosis/large ovarian cyst and cannot PT due to it. Also, actively been trying to conceive for years. Seeking a referral for a second opinion now.
Allergies given family history WRT meds
Allergy (Consternation) – 25X Responses
Allergy and Nat Immunity
Allergy to vax ingredients; med exemption for lack of supply (MS) of FDA approved vaccine supply
Allergy, Health Condition, and Prior Infection

Allergy, natural immunity
Attempted to, was told I was not going to be considered. Would not be referred for allergy testing by PCM.
Bell's Palsy, cancer. Temp approved, permanent denied Feb 22, temp disappeared.
Blood Clotting
Both family history and lack of medical supply
Both Natural Immunity and Lack of Supply
Both natural immunity and personal health condition
Cancer history, allergy, natural immunity, trying to get pregnant
Clinical trial
clinical trial and natural immunity request are pending submission
code MI for natural immunity and MS for lack of FDA approved medical supply. But I don't fit their "criteria."
Concerned about potential spike protein shedding negatively affecting my wife with bone-marrow cancer.
Documented positive serology - previous infection with COVID-19. Medical refused to consider/submit request
Done with trying to comply with criminals
Enrollment in a clinical trial
Entered GSK vaccine trial under duress/received 1 shot and withdrew from trial due to loss of my mother on 10/15 - just over two weeks after her second Pfizer dose
Family history of heart issues, heart attack, strokes, blood clots, high cholesterol, blood pressure issues. Never submitted by chain of command. Denied the opportunity.
For both natural immunity and lack of supply.
Health Condition (Family history or Self) – 25X Responses
Health Condition and Prior Infection
Heart condition, family dementia, fertility issues, hypothyroidism, no FDA approved supply, natural immunity
Heart condition. Never was allowed to submit package.
Heart failure, history of pericarditis and pulmonary embolisms, allergy to latex
I developed compartmental syndrome after 1st shot. They denied this medical exemption without me submitting one. I also have natural immunity, and currently suffering from cardiac/neurological issues as well as weird masses forming around my body so I am requesting to be seen b4 being forced to take the shot. I have received push back.
I had documentation of prior positive antibody test and an adverse reaction to the first dose which left me with increased tinnitus
I was told that since I don't have a history of pericarditis/myocarditis or any known allergies to ingredients in the shots that a medical exemption would not be pursuable.
In process, currently have temporary medical exemption through the end of June 2022.
Lack of Supply (of Licensed Product) – 36X Responses
Lack of Supply and Prior Infection
Lack of supply and safety of the shot

Lack of supply for a fully licensed FDA vaccine
Lack of supply of FDA-approved vaccine; upon initial RAR request I also requested a med exemption for breastfeeding, but that was denied due to CDC guidance
Lack of supply, prior infection, health condition (A-1),
Leiden Factor 5 blood clot gene
Medical issues relevant to the vaccines offered, evidence of immunity, consideration of prior adverse reactions, and a clinical case that is not readily definable, Lack of Supply
Medical Supply due to lack of availability. And Medical based on potential for genetic predisposition to vaccine injury. MS code submitted 19 Apr 22. ME submitted 16 Sep 21. Both denied. MS denied on 20 Apr 22. ME denied on 20 Sep 21.
Medical won't even consider prior infection, nor presence of antibodies.
Monoclonal Regeneron Antibodies
Multiple reasons - natural immunity, family history, potential allergies/health concerns
Multiple: heart attack at age 32 and subsequent dysautonomia, breast feeding. I was told it is being denied despite my State Surgeon recommending approval.
Natural Immunity
Natural Immunity
Natural immunity and airline pilot FAA medical
Natural Immunity and no proof of contracting the virus
Natural immunity, contraindications and lack of FDA supply
No but I did submit a new RAR encompassing all current and future vaccines. I submitted it on 20 Apr 2022 and it is still on my base.
Other exemptions
Participant in COVID-19 study
Participation in a clinical trial for natural antibody longevity.
Past severe reaction to MMR vaccine
Preexisting Immunity IAW AR 40-562
Pregnancy, Breast-feeding. Tried twice but denied.
Pregnant or Breastfeeding – 6X Responses
Previous diagnosis of pericarditis.
Primary Care Physician stated the CG does not consider previous infection natural immunity even though the policy states if a member can prove prior infection they can request exemption.
Prior Infection (Natural Immunity) – 50X Responses
Prior infection and Allergy
Prior infection and lack of supply. Was told by my commander that a lack of approved supply was not a reason to violate a direct order and I will be receiving negative paperwork in my record.
Prior infection and participation in a clinical study.
Prior infection, health condition, family history, allergy
Prior infection, which is grounds for an exemption in AFI 48-110. Immediately denied after submission.
Prior Infection. Immediately denied following submission.

Prior n friction and Obstructive Sleep Apnea awaiting treatment
Prior reactions to other shots containing the same ingredients as the COVID shots
Recovery from surgery.
Severe allergic reaction to flu shot in 2012; exempt from all vaccines
Supply, immunity, unvax cohort study, allergy
Unexplained erratic chest (heart) pain
