

Sump-Pump

Do you have a sump pump that is not kicking on or is not emptying? Is it not working due to power failure or a stuck switch? Has it died from old age? Do you need a battery back-up sump pump?

Whatever the problem, our plumbers will diagnose it, repair it or replace it quickly and accurately.

We are here to help you protect your basement against menacing flood waters, storms and heavy downpours.

Not sure what a Sump Pump is?

A sump pump is usually an electric pump that is placed in the basement of a home, and used to pump water from the basement to outside the home.

Since basements are typically below ground level, draining the water out is nearly impossible without a quality sump pump.

Sump pumps are lifesavers when it comes to protecting your home from flooding.

Sump pumps will solve most basement flooding and leaking issues as they are designed to remove water from basements and crawlspaces.

We do:

- Sump Pump Repair
- Sump Pump Maintenance
- Sump Pump Installation and Replacement
- Back-Up Sump Pumps

We provide:

- Free written estimates
- Free inspection of current sump pump and waterproofing system
- Sump pump installation and replacement
- Basement sump pumps and crawl space sump pumps
- Battery backup systems for added protection

Don't let a broken sump pump or a power outage stand between you and a dry basement. Call us 24 hours a day [\(704\) 594-7280](tel:7045947280).
