SUMMARY

Safety Professional with Nine Years in the field, with experience in Construction Safety, Production Safety, Drilling Safety, Well Intervention Safety, and Production Safety. I have a passion for protecting a company's most valuable assets: its people and property. I have demonstrated this throughout my career. I realize that my success has been due to teams I have collaborated with and had the privilege of working with. I want to bring the same collaborative, team first approach to your company and deliver incident and accident free operations. In the nine years that I have been in the field, I have invested in my growth by completing a Bachelor degree in Occupational Safety and Health, and obtained my professional certification as a Certified Safety Professional (CSP), which was a culmination of years of hard work and sacrifice, although it felt good to achieve; I realize that it was the years in the field that made me the professional I am today. The experiences and skills that I have learned and gained is what I bring to the table and can benefit your team and your customers from day one. I have Experience and Knowledge in the following areas:

- Behavioral Based Safety
- Regulatory Compliance (OSHA, USCG, BSEE)
- Incident Investigation
- Hazard Analysis / Mitigation
- Risk Management
- Continual Improvement Process
- Contractor/Vendor Management
- Health and Safety Management
- Training and Development
- Incident Management
- Emergency Response
- Record Keeping
- Interface with Government Agencies
- Proficiency in use of program platforms: SAP, SEMP, ISN, Microsoft Suite
- Interface with all levels of Management and regulatory agencies

PROFESSIONAL EXPERIENCE

Oil Corporation, Houston, TX

May 2012 - Present

Oil Corporation is an oil and natural gas leader committed to North American onshore, global offshore and exploration interests.

Sr. HSE Field Technician

- Implement regulatory, and company policies and procedures, which resulted in the division and the company going incident and accident free and my division leading the company every year regarding TRIR.
- Spearheaded initiative to get management to agree to using only crews with working supervisors who ensured safety of employees and the quality of workmanship; this resulted in a significant reduction of incidents and near misses.
- Established relationship with vendor and conceived plan to have a scheduled annual swap out of all safety equipment and devices that need to be inspected and recertified on an annual basis; this resulted in a smooth swap out of all safety equipment and devices that ensure nothing slips through the cracks and shows employees adherence to companies policies and core values.

Sr. Safety Training Specialist

- Due to the retirement of a valued team member, I was promoted to a Sr. position responsible for regulatory compliance and all safety planning for my location; which resulted in a seamless transition with no regulatory infractions to this day that I was in control of.
- Improved safety on the facility by increasing the Safety Observation Program by appointing a SOP team leader that made announcements and encouraged and led participation in the program, benefits were two-fold, increased hazard recognition; and an increase in the morale of the work crews.

Safety Training Specialist (Direct Hire)

- Hired directly by (Company) to Manage All aspects of Safety on the facility I was assigned to
- Managed all training and compliance
- Managed contractor safety and compliance
- Managed all incidents and worked with telemedicine provider to provide treatment as directed by Physician

Safety Coordinator (Assigned to Oil Company by Safety Contract Company – Industrial Solutions, La.

- Assigned to Oil company to manage multiple facets of safety – Drilling, Production, Construction and Well Intervention – managing simultaneous operations and responsible for the Safety of 104 persons onboard facility daily.

Energy Services, LA.

October 2007 - May 2012

Energy Services, Inc. serves the drilling, completion and production-related needs of oil and gas companies worldwide.

200 Ton Mate

- Managed and trained crew of 12 to support construction projects and well intervention projects that vessel was involved in for various companies in the Gulf of Mexico.
- Responsible for Safety and training of crew members and contract crews that utilized living quarters and crane and rigging operations from vessel.
- Responsible for all emergency drills and regulatory record keeping and reporting.
- Responsible for interfacing with the United States Coast Guard during regulatory inspections.

EDUCATION

Bachelor of Science, Occupational Safety and Health, Columbia Southern University, Orange Beach, AL.

CERTIFICATIONS
