Piracy Megathread v2.0

MEGATHREAD

[Changelog here](#)

*Any comments requesting pirated content will be automatically deleted.*

This thread is a revision of [u/Klappa4Me](#)'s original Piracy Megathread listed [here](#) which has been archived. For the sake of consistency, I will try to adhere to his format. **All lists are ordered alphabetically.**

For FAQs, Guides, links to tool support threads, or general piracy information, visit the [wiki](#) for more information.

If you have any suggestions you want to see added to this megathread, leave it in a comment. This is a community thread I will try to update weekly.

## I. PRIVACY/SECURITY

### VPNs

If it has not become apparent yet, popular VPN services aggressively market their products not just in this subreddit but in Reddit as a whole. Do not subscribe to a service just because Reddit deems it popular, cheap, or because it hits the frontpage. Do your own research. You're entrusting an entity with your personal data. Not to mention VPN experiences are completely anecdotal. Someone's great experience with a particular VPN may vary from yours if you're connected to different servers, physically in different locations, different operating systems, download speeds, etc. There are far too many variables to successfully vague a VPN.

With that said, [ThatOnePrivacySite](#) is a great resource to start with but it shouldn't be your final destination. Most if not all popular VPNs offer trials or immediate refunds. Use them to your advantage. Read VPNs' terms of service. Below are some resources in which you can start your research with:

- [ThatOnePrivacySite VPN Chart](#)
- [Choosing the best VPN for you](#)
- [TorrentFreak 2017 VPN interview](#)
- [TorrentFreak 2016 VPN interview](#)
- [EEF Overview on what a VPN is and how to choose one](#)
- <https://www.reddit.com/r/VPN/wiki/index>
- <https://www.reddit.com/r/Privacy/wiki/index>

Beware of free VPNs if you plan on using one for online purchases or to login websites with sensitive data (banking for example). Many free VPNs are able to provide their free services because they datamine, interposing ads in your searches, etc... Beware of pirating VPNs. You wouldn't pirate a condom?

[An alternative to purchasing your VPN is hosting your own](#). You will have much more flexibility and you can have your VPS hoster outside your country's copyright law jurisdiction.

### Adblockers & useful extensions

- [uBlock origin](#) for blocking most ads and pop-ups.
- [uBlock-safari](#) port for Safari or MacOS users.
- [uBlock origin extra](#) - companion extension for websites that block ad-block extensions (even with Anti-Adblock Killer enabled in uBlock origin).

## II. TORRENT CLIENTS

- [Deluge](#) - similar to qbittorrent with a different UI some may find clunky.
  - [Qbittorrent](#) - free open-sourced client. No ads and has a built-in search feature that searches popular public trackers. Consistently updated.
  - Tixati - extremely customizable. All menus can be rearranged and color scheme can be changed completely. Many private trackers however may not permit this client to be used.
  - [Transmission](#) - popular macOS and unix torrent client.
- 
- 

## III. TORRENT INDEXERS/SITES

## IV. EBOOKS/TEXTBOOKS

If you have purchased the kindle edition of your book and wish to strip its DRM and export it to .pdf, view this [guide](#) on how to deDRM your book.

If the ebook you are searching is available for kindle, you may also *[borrow]*

([https://www.reddit.com/r/Piracy/comments/3ma9qe/guide\\_how\\_to\\_rent\\_your\\_textbooks\\_for\\_free\\_from/](https://www.reddit.com/r/Piracy/comments/3ma9qe/guide_how_to_rent_your_textbooks_for_free_from/)) the ebook, use the guide, and then return it back.

Below are a list of popular search engines/sites for books:

- [u/Amosqu's custom search engine](#) - searches for books in the majority of the indexers listed below. See his thread [here](#).
- [r/Piracy updated ebooks custome search engine](#) - removed all dead links and added new websites. See here for the contents of the sites it scrapes: <https://pastebin.com/aapQMv7t>
- [b-ok.org](#) - formerly known as Bookzz.
- [booksc.org](#) - scientific research papers.
- [ebookee.org](#)
- [freebookspot.es](#)
- [Library Genesis](#) - most popular.
- [mirror](#)
- [Project Gutenberg](#)
- [sci-hub.cc](#) - scientific research papers.
- [audiobookbay.me](#) - audiobooks.
- [Hampshire College has compiled a list of databases/indexers that provide free ebooks including: children's book, study guides, tutorial guides, etc... Many of the non-fictional works are canonical literary works.](#)

Private trackers:

- [MyAnonamouse](#) - private tracker for ebooks/audiobooks
- [bibliotik](#) - private tracker for ebooks/audiobooks

## V. COURSES/TUTORIALS

- See Section III & X. Many popular torrent indexers have courses such as Rutracker, 1337x.to, and demonoid.pw.
- [freeudemy.me](http://freeudemy.me) - Udemy courses available via direct Google Drive links & torrents.
- [gfxdomain.net](http://gfxdomain.net) - computer graphics design tutorials/courses via fileshosters (some through torrents).
- [git.ir](http://git.ir) - hosts many courses/tutorials from udemy, tutsplus, lynda, etc... Available through direct download links.

---

---

## VI. GAMES

#### Game Repackers

- CorePack
- FitGirl Repack
- R.G. Mechanics

#### Game Scene Groups

- CODEX
- CPY
- SKIDROW

#### Direct Download:

- [fitgirl-repacks.site](http://fitgirl-repacks.site)
- [igg-games.com](http://igg-games.com)

- Also [cs.rin.ru](http://cs.rin.ru) - dedicated game piracy forum.
- Scene groups do not have official websites. If you find a site using the name of a scene group, they are impersonating them. Beware of these sites; often they may package the release with malware.\*

Hi people. I installed project cars 2 on my pc, the fitgirl repack one. it's the 18.2gig file. but when i open it, the game does not launch. after i double click it, it asks me if i want to allow the programme to make changes to my computer and i say yes but then nothing happens afterwards. Im not really good with installing games (i dont understand cracks and codex and all those things)

Please help. Thanks!!

There's sometimes a folder that comes with it (or is installed with it) called hacks or something like that. It'll often have an exe that you can try replacing the main exe with. I don't know if that's the case for you, but check

ISP just blocked my Internet yesterday b/c "copyright issue" i use deluge and go through a VPN , problem I see is that I used a US server , was that my mistake?

↑ ↓ Edit:VPN - PIA also I configured a raspberry pi via command line with openvpn using PIA with deluge , so idk where I went wrong , maybe kill switch failed. They only caught 3 things not all of them

Share Report Save

WeStandUnited5009 1 point · 1 year ago

↑ ↓ What about with Linux

Share Report Save

tomarr 1 point · 1 year ago

↑ ↓ I imagine you can set up something similar with iptables , I think PIA puts everything through the VPN on a 10 /8 so h restricting your 192.168 /16 (or whatever) should block non-vpn traffic over the ports you select (which you can match with your torrent client)

↑ ↓ Been trying to use gostream.is recently but today it opened a new tab when trying to browse it despite ublock origin. Anyone else experiencing this?

↑ ↓ I've never had this problem before, it's a pretty great site. I also use ublock origin on chrome.

↑ ↓ Why aren't there any new movies in 4K available? I have no issues buying them in 4K but a 4K player is too expensive atm for me. EDIT: Btw you should put [horriblesubs.info](#) on the list for Anime torrents, it's the one i always use.

↑ ↓ Add [Standard Ebooks](#) under the ebooks heading. DRM-free, clean & nicely-formatted ebooks.

↑ ↓ Not piracy, all perfectly legal as they are all in the public domain, just like Project Gutenberg, which is listed in the OP.

↑ ↓ Solidworks 2017 SP4. Need it for home use and I simply can't get the TeamSolidSquad activator to work. I get an "error 6" message, followed by a 'success' one when trying to activate the licences. The installer immediately tells me it can't validate the end date of my licenses and proceed to ask me to do online activation, so the activator is clearly not working. Moreover I get a message that says something like "There is a restart pending from another installation" when I begin the setup, even tho I uninstalled SolidWorks 2012 like a year ago. I've tried manually cleaning the registry several times but i still get the same issues. Any help?

↑ ↓ Just use bittorrent, it's basically the same but with a different name.

↑ ↓ I've been using utorrent 2.2.1 for years. It's safe if you use an old version.

Share Report Save

jatb\_Scene 8 points · 1 year ago

↑ ↓ Except when old versions contain exploits that are not patched. 2.2.1 uses the schannel TLS implementation built into Windows, so out-of-date Windows installs are very vulnerable to certain [exploits](#). Most computers would not be actively exploited since these exploits require the ability to arbitrarily communicate on open WAN ports - something that utorrent would provide in a uPNP or portforwarded scenario.

↑ ↓ Alternatives to find music? Come using vk.com + skyload (extension) and in the latter stop working, may not be the best place to download things but always found everything.
