

Reginald Beaufort VIII

(555) 555-5555 | reggie@none.com

Senior Rich Internet Application / Single Page Application Specialist

TECHNOLOGIES

Expert: Javascript, jQuery, AngularJS, React, Node.js

Intermediate: PHP, MySQL, C#, .NET, CSS3, HTML5, Java

WORK EXPERIENCE

Wordpress Consultancy

2015 – 2016

Senior Web Engineer (Remote)

- Successfully launched rich internet applications using **AngularJS** or **ReactJS** on top of **wordpress** for the following customers:
 - GovLoop
 - AMC
 - IFC
 - Lowrider Magazine
 - Motortrend Magazine

Largest Entertainment Company on Earth

2011 – 2014

Senior Engineer (San Francisco, CA)

- Created the **web platform** and **gameplay elements** for the following games
 - a park builder game
 - a side scroller mini-game
 - Find the detail game
- Created an automated **asset pipeline** and related tooling to get art from the artists into the game with NO developer intervention
- **Led a team** to assess and fix core game speed and asset loading issues

Facebook Gaming Company – Successful Exit

2010 – 2011

Web Engineer (San Francisco, CA)

- Launched two time management games, Buy Me Stuff and Manage A Bar, which generated more than **\$2 million in revenue**.
- Created the web platform responsible for launching both games simultaneously on five social networks (Facebook, Hi5, MySpace, Orkut and Playdom's own social network).

Small failed startup

2008 – 2010

Web Engineer (San Francisco, CA)

- Added **new, profitable features** to a pre-existing "grey market" **online interactive storefront**. Implemented features include:
 - Bid feature. This allowed customers to see and bid on products with immediate feedback.
 - UX Advancements to the shopping cart, including advanced field validation and a better error recovery flow.
 - Search auto-complete, just like on google, except for part numbers and names.
 - Multiple part number search, so customers can search for everything they're looking for in a single search.

Even Smaller failed startup

2006 – 2008

Web Engineer (San Mateo, CA)

- Contributed to an interactive desktop environment running solely in the browser.
- Created **customized widgets** for Alltel, Verizon, Cablevision and IBM.
 - Widgets created include weather, rss, **SIP webphone** and financial visualizations.

EDUCATION

Hamilton University - BS in Computer Science

Art College with Writing Program – MFA in Creative Writing
