

Applications of our MDPE Pipe fittings Products

- Ease of application - Intermediate
- Our **MDPE Pipe** range is suitable for use with cold water plumbing applications, both above and below ground. The pipe and fittings are lightweight, robust, and easy to install even in confined spaces.
- Suitable for cold water distribution systems and waste water
- Excellent resistance to corrosion and a wide range of chemicals
- Robust construction with high impact resistance
- Greater flexibility, offering superior performance where ground movements occur
- Not suitable for hot water applications, compressed air or chemical waste applications
